Americans for the Arts' Arts & Economic Prosperity IV Study

- Collaborated with Americans for the Arts to conduct a comprehensive study of our local nonprofit arts industry
- Released in June 2012, this study is the most comprehensive economic impact study of the nonprofit arts industry ever conducted.
- By demonstrating that investing in the arts and culture yields economic benefits, this study lays to rest the common misconception that communities support the arts and culture at the expense of local economic development. In fact, communities that support the arts and culture not only enhance their quality of life; they also invest in their economic well-being. The arts mean business!
- Tacoma Study Results
 - Based on the responses of 44 arts and culture organizations in Tacoma, the study found that Tacoma's nonprofit arts and culture industry generates:
 - \$64.72 million in economic activity every year
 - \$34.86 million in spending by organizations
 - \$29.86 million in event-related spending by audiences (not including cost of event admission)
 - The local impact of this activity is significant, creating:
 - 1,735 full-time equivalent jobs
 - \$40.52 million in resident household income
 - \$6.58 million in local and state government revenue
 - \$2.82 million in local revenue
 - \$3.76 million in state revenue
 - This study also tracked the event-related spending by audience members. Of the 1,224,097 nonprofit arts and culture audience members in 2010, 73.8% reside within Pierce County, 26.2% reside outside Pierce County.
 - Non-local attendees spend an average of 58% more than their local counterparts.

"It is so important for a city to reflect on and remind itself of its accomplishments. I am so impressed with what you (all of you in Tacoma's arts and culture scene) do."
