Executive Summary

Survey Purpose

The Tacoma Citizen Survey serves as a consumer report card for the City by providing residents the opportunity to rate the quality of life in the city and their satisfaction with community amenities and local government. The survey also allows residents to provide feedback to the City government on what is working well and what is not. The baseline Tacoma Citizen Survey was conducted in 2006. This was the second iteration of the survey.

Methods

For the 2010 survey, 9,600 residents within city boundaries were randomly selected to receive survey mailings. Using mapping software, a map of the city was separated into 14 "zones" by overlaying the boundaries of the five Councilmanic Districts with the boundaries of the eight Neighborhood Council Districts. Certain zones and types of households were oversampled to ensure representation of all types of residents. Households received four separate mailings, and completed surveys were collected over a six week period.

Of the 9,600 surveys mailed in late July and early August 2010, about 507 were returned because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the 9,093 households that received a survey, 3,024 completed the survey, providing an overall response rate of 33%. This is a good response rate; typical response rates for a mailed resident survey range from 25% to 40%. It is customary to describe the precision of estimates made from surveys by a "level of confidence" (or margin of error). The 95% confidence level is typically no greater than plus or minus two percentage points around any given percent based on community-wide estimates.

The demographic characteristics of the survey sample for each of the five Councilmanic Districts were compared to those found in the 2000 Census estimates provided by the City and were statistically adjusted to match the Census profile using tenure, age, race, gender and district, when necessary.

Comparisons were made between 2010 responses and those from 2006, when available, as well as to a handful of questions from the 2002 Tacoma Citizen Budget Priorities Survey. In addition, results were compared by demographic characteristics and geographic area of residence. The City of Tacoma also elected to have results compared to those of other jurisdictions around the nation and to jurisdictions of similar population size. These comparisons are made possible through National Research Center's (NRC's) national benchmark database, which contains resident perspectives gathered in citizen surveys from approximately 500 jurisdictions, including cities and counties.

Survey Findings

For the most part, ratings of Tacoma services and characteristics are better in 2010 than they were in 2006. Quality of life and community received "good" or "fair" ratings by a majority of respondents, with Tacoma as a place to live receiving the most favorable ratings. Ratings for each aspect of quality of life saw an increase in 2010 when compared to 2006 ratings, although the proportion of residents thinking the quality of life in Tacoma would improve "slightly" or "a lot" in the coming five years has decreased somewhat since 2006.

Residents indicated at least some participation in most community activities when asked to assess their level of community involvement in the 12 months prior to the survey administration. Internet use and use of the Tacoma City Web site to conduct business with the City of Tacoma increased from 2006 to 2010, as did participating in neighborhood activities and volunteering time to some group or activity in Tacoma.

In 2010, convenient access to neighborhood and community parks was the community characteristic rated most favorably, followed by shopping opportunities; openness and acceptance towards people of diverse backgrounds; opportunities to attend cultural activities; access to affordable, quality food; and the accessibility of City facilities for persons with disabilities. Of the 26 community characteristics rated by survey participants, eight characteristics received favorable marks from a higher proportion of respondents in 2010 than in 2006 and seven received "good" or "excellent" ratings by fewer residents in 2010 when compared to 2006. While most changes in resident perceptions about Tacoma community characteristics between 2010 and 2006 were slight, the overall quality of new development in Tacoma, business opportunities and job opportunities saw a decrease in ratings by 15% or more from 2006 to 2010, which is partially attributable to the recent economic downturn.

When asked to give their opinions about growth and potential problems facing the community, respondents viewed job opportunities and jobs growth as challenges for Tacoma. Crime, drugs and the condition of streets (potholes) also were viewed as at least moderately problematic by 2010 survey respondents. Overall, 15 of 23 items were of slightly less concern for 2010 residents than 2006 residents.

The survey included several questions pertaining to safety in the City and responses indicated that residents generally felt safer in 2010 than they did in 2006. Also, the proportion of respondents reporting that they had been a victim of a crime in the City of Tacoma in the previous 12 months decreased from 2010 to 2006.

Just over half of respondents rated the overall quality of services in Tacoma as "good" or "excellent," similar to responses given in 2006. Of the 34 services rated by survey respondents in 2010, 17 were rated as "good" or "excellent" by half or more residents. Of the 19 services where there were significant differences between 2010 and 2006 ratings, 17 services received more favorable ratings in 2010 than in 2006. Police services, storm drainage, crime prevention and code enforcement saw increases in quality of 10% or more. When asked which Public

Works services should receive the most emphasis, about three-quarters of respondents thought emphasis should be placed on street repairs.

Of the 50% of respondents who had contact with a City employee in the prior 12 months, a majority rated their overall impression of the City employee as "good" or "excellent." At least 7 in 10 rated employee knowledge, responsiveness and courtesy with positive marks. For the most part, employee ratings in 2010 were similar to ratings given in 2006 with the exception of "courtesy," which received slightly higher ratings in 2010.

Nearly half of all respondents rated the overall performance of the Tacoma City government favorably, similar to 2006. Half or nearly half of residents agreed that Tacoma City government welcomes citizen involvement and that they are pleased with the overall direction the City is taking. Results showed that about twice as many respondents "strongly" disagreed than "strongly" agreed with other statements regarding public trust, although "I receive good value for the City taxes I pay" saw small improvements from 2006 to 2010 in the proportion agreeing with this statement. When asked specifically about Tacoma's land use and planning, nearly half of 2010 respondents reported that they were pleased with the design of commercial development in Tacoma, down slightly from 2006 ratings.

Survey Background

Survey Purpose

The Tacoma Citizen Survey serves as a consumer report card for the City by providing residents the opportunity to rate the quality of life in the city and their satisfaction with community amenities and local government. The survey also allows residents to provide feedback to the City government on what is working well and what is not, and their priorities for community planning and resource allocation.

Focus on the quality of service delivery helps council, staff and the public to set priorities for budget decisions and lays the groundwork for tracking community opinions about the core responsibilities of Tacoma City government, helping to assure maximum service quality over time.

This kind of survey gets at the key services that local government controls to create a quality community. It is akin to private sector customer surveys that are used regularly by many corporations to monitor where there are weaknesses in product or service delivery before customers defect to competition or before other problems from dissatisfied customers arise.

The baseline Tacoma Citizen Survey was conducted in 2006. This was the second iteration of the survey.

Methods

The 2010 survey was mailed to 9,600 randomly selected Tacoma residents. A map of the City was separated into 14 "zones" by overlaying the boundaries of the five Councilmanic Districts with the boundaries of the eight Neighborhood Council Districts (see map in *Appendix F. Survey Methodology*).

To ensure that households selected to participate in the survey were within the City of Tacoma boundaries, the latitude and longitude of each address was plotted to determine its location (i.e., zone) within the city. Addresses that fell outside of the city boundaries were removed from the sample. Attached units within the city were oversampled to compensate for detached unit residents' tendency to return surveys at a higher rate. An individual within each household was selected using the birthday method.

Those selected to participate in the survey received four mailings, one week apart, beginning in August of 2010. The first mailing was a prenotification postcard announcing the upcoming survey. The following two mailings contained a letter from the Mayor, a questionnaire and a postage-paid envelope. Residents selected to participate were provided the opportunity to complete the survey online instead of on paper. The fourth mailing was a follow-up reminder postcard. About 5% of the initial postcards were returned as undeliverable because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the 9,093 households that received the survey, 3,024 respondents completed a survey, 128 of which were completed via an online version of the survey, providing an overall response rate of 33%.

Survey results were weighted so that the respondent tenure, age, race, gender and district more closely represented the proportions reflective of the entire city. (For more information see *Appendix F. Survey Methodology*.)

Reaching Non-English-Speaking Residents

The cover letter and survey were mailed to residents in English. The cover letters included a paragraph in Spanish that described the purpose of the survey and included a number that respondents could call to request the survey in Spanish. Two respondents requested the survey in Spanish and one completed the survey using the Spanish version.

The survey packet also included a one page insert with a paragraph in four languages (Russian, Vietnamese, Korean, and Cambodian) that described the contents of the packet and provided a phone number to call if the resident wanted to receive the survey in another language, or get assistance in completing the survey.

How the Results Are Reported

For the most part, frequency distributions (the percent of respondents giving each possible response to a particular question) are presented in the body of the report. In addition, the "percent positive" is reported for some questions in the report body tables and charts. The percent positive is the combination of the top two most positive response options (i.e., "excellent" and "good," "strongly agree" and "somewhat agree," "very safe" and "somewhat safe").

On many of the questions in the survey, respondents gave an answer of "don't know." The proportion of respondents giving this reply is shown in the full set of responses included in *Appendix B. Complete Set of Survey Frequencies* and is discussed in the body of this report if it is 20% or greater. However, these responses have been removed from the analyses presented in the body of the report, unless otherwise indicated. In other words, the majority of the tables and graphs in the body of the report display the responses from respondents who had an opinion about a specific item.

For some questions, respondents were permitted to select or write in multiple responses. When the total exceeds 100% in a table for a multiple response question, it is because some respondents are counted in multiple categories. When a table for a question that only permitted a single response does not total to exactly 100%, it is due to the common practice of percentages being rounded to the nearest whole number.

Precision of Estimates

It is customary to describe the precision of estimates made from surveys by a "level of confidence" (or margin of error). The 95 percent confidence level for this survey is generally no greater than plus or minus two percentage points around any given percent reported for the entire sample (3,024 completed surveys). Where estimates are given for subgroups, they

are less precise. Generally the 95% confidence interval is plus or minus five percentage points for samples of about 400 to 10 percentage points for samples as small as 100, and for smaller sample sizes (e.g., 60), the margin of error rises to 13%.

Comparing Survey Results Over Time

Comparisons are made between 2010 responses and those from 2006, when available, as well as to a handful of questions from the 2002 Tacoma Citizen Budget Priorities Survey. Differences between percentages by year reported in the body of the report can be considered "statistically significant" if they are greater than three percentage points. Trend data for Tacoma represent important comparisons and should be examined for improvements or declines. Deviations from stable trends over time especially represent opportunities for understanding how local policies, programs or public information may have affected residents' opinions.

Comparing Survey Results by Geographic and Demographic Subgroups

Select survey results were compared by demographic characteristics of survey respondents and geographic area of residence (Councilmanic Districts and Neighborhood Districts). Councilmanic District comparisons are included and discussed in the body of the report. The full set of the demographic and Neighborhood District comparisons can be found in *Appendix D. Comparison of Select Questions by*

Respondent Characteristics and Appendix E. Comparison of Select Questions by Neighborhood District). Where differences between subgroups are statistically significant, they are marked with grey shading in the tables.

Comparing Survey Results to Other Jurisdictions

Jurisdictions use the comparative information provided by benchmarks to help interpret their own citizen survey results, to create or revise community plans, to evaluate the success of policy or budget decisions, and to measure local government performance. It is not known what is small or large without comparing. Taking the pulse of the community has little meaning without knowing what pulse rate is too high and what is too low. When surveys of service satisfaction turn up "good" citizen evaluations, it is necessary to know how others rate their services to understand if "good" is good enough or if most other communities are "excellent." Furthermore, in the absence of national or peer community comparisons, a jurisdiction is left with comparing its fire protection rating to its street maintenance rating. That comparison is unfair as street maintenance always gets lower ratings than fire protection. More illuminating is how residents' ratings of fire service compare to opinions about fire service in other communities and to resident ratings over time.

A police department that provides the fastest and most efficient service – one that closes most of its cases, solves most of its crimes, and keeps the crime rate low – still has a problem to fix if the residents in the city rate police services lower than ratings given by residents in other cities with objectively "worse" departments.

Benchmark data can help that police department – or any City department – to understand how well citizens think it is doing. Without the comparative data, it would be like bowling in

a tournament without knowing what the other teams are scoring. Citizen opinion should be used in conjunction with other sources of data about budget, population demographics, personnel, and politics to help managers know how to respond to comparative results.

NRC's database of comparative resident opinion is comprised of resident perspectives gathered in citizen surveys from approximately 500 jurisdictions whose residents evaluated local government services. Conducted with typically no fewer than 400 residents in each jurisdiction, opinions are intended to represent over 30 million Americans. NRC has innovated a method for quantitatively integrating the results of surveys that we have conducted with those that others have conducted. These integration methods have been described thoroughly in Public Administration Review, Journal of Policy Analysis and Management, and in NRC's first book on conducting and using citizen surveys, Citizen Surveys: how to do them, how to use them, what they mean, published by the International City/County Management Association (ICMA). Scholars who specialize in the analysis of citizen surveys regularly have relied on NRC's work [e.g., Kelly, J. & Swindell, D. (2002). "Service quality variation across urban space: First steps towards a model of citizen satisfaction," Journal of Urban Affairs, 24, 271-288.; Van Ryzin, G., Muzzio, D., Immerwahr, S., Gulick, L. & Martinez, E. (2004). "Drivers and consequences of citizen satisfaction: An application of the American Customer Satisfaction Index Model to New York City," Public Administration Review, 64, 331-341]. The method described in those publications is refined regularly and statistically tested on a growing number of citizen surveys in NRC's proprietary databases.

Jurisdictions in NRC's benchmark database are distributed geographically across the country and range from small to large in population size. Comparisons may be made to all jurisdictions in the database or to a subsets of jurisdictions (within a given region or population category such jurisdictions of a similar population size), as in this report. Despite the differences in jurisdiction characteristics, all are in the business of providing local government services to residents. Though individual jurisdiction circumstances, resources, and practices vary, the objective in every community is to provide services that are so timely, tailored, and effective that residents conclude the services are of the highest quality. High ratings in any jurisdiction, like SAT scores in any teen household, bring pride, and a sense of accomplishment.

Putting Evaluations onto the 100-point Scale

Although responses to many of the evaluative questions were made on a 4 point scale with 1 representing the best rating and 4 the worst, the benchmarks are reported on a common scale where 0 is the worst possible rating and 100 is the best possible rating. The 95 percent confidence interval around an average score on the 100-point scale is no greater than plus or minus two points based on all respondents.

The 100-point scale is not a percent. It is a conversion of responses to an average rating. Each response option is assigned a value that is used in calculating the average score. For example, "excellent" = 100, "good" = 67, "fair" = 33 and "poor" = 0. If everyone reported "excellent," then the average rating would be 100 on the 100-point scale. Likewise, if all respondents gave a

"poor," the result would be 0 on the 100-point scale. If half the respondents gave a score of "excellent" and half gave a score of "poor," the average would be in the middle of the scale (like the center post of a teeter totter) between "fair" and "good."

Comparison of Tacoma to the Benchmarking Database

Jurisdictions to which Tacoma's average ratings are compared can be found in *Appendix G*. *Jurisdictions Included In Benchmark Comparisons*. National benchmark comparisons and comparisons to jurisdictions of similar population size to Tacoma (100,00 to 350,000) have been provided when similar questions on the Tacoma survey are included in NRC's database and there are at least five jurisdictions in which the question was asked, though most questions are compared to far more than five other cities across the country or of similar population size.

Where comparisons for quality ratings were available, the City of Tacoma's results were generally noted as being "above" the benchmark, "below" the benchmark or "similar" to the benchmark. For some questions – those related to resident behavior, circumstance or to a local problem – the comparison to the benchmark is designated as "more," "similar" or "less" (for example, residents contacting the City in the last 12 months). In instances where ratings are considerably higher or lower than the benchmark, these ratings have been further demarcated by the attribute of "much," (for example, "much less" or "much above"). These labels come from a statistical comparison of Tacoma's rating to the benchmark where a rating is considered "similar" if it is within the margin of error; "above," "below," "more," or "less" if the difference between Tacoma's rating and the benchmark is greater the margin of error; and "much above," "much below," "much more" or "much less" if the difference between your Tacoma's rating and the benchmark is more than twice the margin of error.

Report of Results

Quality of Life and Community

The first questions on the 2010 Tacoma Citizen Survey asked residents to rate the quality of life in the City and various aspects of the community; a majority of respondents gave "good" or "fair" ratings. About half thought the quality of life in Tacoma would improve in the next five years. When comparing ratings of various community characteristics over time, ratings generally were the same with a few slight increases and decreases; however, residents saw opportunities for improvement for the quality of new development, business opportunities and job opportunities.

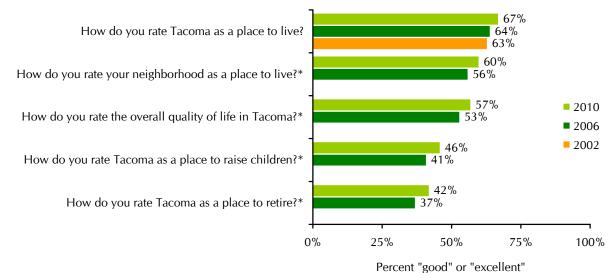

Aspects of Quality of Life

About two-thirds of respondents reported that Tacoma is a "good" or "excellent" place to live. About 6 in 10 respondents rated their neighborhood as a "good" or "excellent" place to live and a similar proportion (57%) evaluated the overall quality of life in Tacoma to be "good" or better; both saw a slight increase from 2006 to 2010. Forty-six percent gave Tacoma as a place to raise children "good" or "excellent" ratings and 42% gave favorable ratings for the City as a place to retire. These ratings have increased over time (see Figure 1 on the following page).

Comparing results by Councilmanic Districts, residents living in Districts 1 and 2 tended to give more positive ratings than those living in other Councilmanic Districts (see Figure 2 on the following page).

Comparisons of Tacoma's ratings for quality of life and community were made to all jurisdictions in NRC's benchmark database as well as to jurisdictions of similar population size (for a complete list of cities and counties to which Tacoma ratings were compared, see *Appendix G. Jurisdictions Included In Benchmark Comparisons*). Tacoma's quality of life ratings were much below the national and population size average ratings (see Figure 3 on the following page).

*Indicates statistically significant differences between 2010 and 2006.

"How do you rate your neighborhood as a place to live," "How do you rate the overall quality of life in Tacoma," "How do you rate Tacoma as a place to raise children" and "How do you rate Tacoma as a place to retire" were not asked in 2002.

Figure 2: Quality of Life Compared by Councilmanic Districts											
Circle the number that best represents your opinion:	District 1	District 2	District 3	District 4	District 5	Overall results					
How do you rate Tacoma as a place to live?	77%	76%	65%	60%	59%	67%

How do you rate Tacoma as a place to retire?	8%	34%	35%	23%	100%	much below	much below

Benchmark comparisons use the average rating (0=poor, 33=fair, 67=good, 100=excellent).

About half thought the quality of life in Tacoma would improve in the next five years, 3 in 10 respondents thought it would stay the same and about a quarter thought it would decline. The proportion of residents thinking the quality of life in Tacoma would improve "slightly" or "a lot" has decreased somewhat since 2006. Residents living in Districts 2, 3 and 4 were the most optimistic about the quality of life in the City in the next five years when compared to residents living in Districts 1 and 5.

Percent reporting "improve slightly" or "improve a lot."

Grey shading indicates statistically significant differences between subgroups.

Community Characteristics

Residents responding to the survey were asked to rate 26 community characteristics. Convenient access to neighborhood and community parks was rated most favorably, with 7 in 10 giving a "good" or "excellent" rating. Shopping opportunities, openness and acceptance towards people of diverse backgrounds, opportunities to attend cultural activities, access to affordable, quality food and the accessibility of City facilities for persons with disabilities received "good" or better ratings by 6 in 10 respondents. Items rated less positively (where 33% or fewer gave "good" or "excellent" ratings) were: access to affordable, quality child care; the overall image or reputation of Tacoma; business opportunities; the availability of parking downtown; and job opportunities. Note that at least 20% said "don't know" when asked to rate the following community characteristics: availability of social services programs (21%), business opportunities (22%), accessibility of City facilities for persons with disabilities (29%), access to affordable, quality child care (48%), ease of bus travel in Tacoma (29%), ease of rail travel in Tacoma (37%) and ease of bicycle travel in Tacoma (30%). For a complete set of responses for all survey questions, including "don't know" responses, please see *Appendix B. Complete Set of Survey Frequencies*.

Eight characteristics received "good" or "excellent" marks from a higher proportion of respondents in 2010 than in 2006:

- openness and acceptance towards people of diverse backgrounds
- opportunities to attend cultural activities
- ease of walking in Tacoma
- cleanliness of the private properties in your neighborhood
- sense of community
- air quality
- access to affordable, quality housing
- ease of bicycle travel in Tacoma

Seven received "good" or "excellent" ratings by fewer residents in 2010 than in 2006:

- access to affordable, quality food
- educational opportunities
- ease of bus travel in Tacoma
- ease of rail travel in Tacoma
- the overall quality of new development in Tacoma
- business opportunities
- job opportunities

While most changes between 2010 and 2006 were slight, the overall quality of new development in Tacoma, business opportunities and job opportunities saw a decrease in ratings by 15% or more from 2006 to 2010 (see Figure 7), which is likely partially attributable to the recent economic downturn.

Residents living in Districts 1 and 2 generally gave more positive ratings than did those living in other areas of Tacoma (see Figure 8).

The ease of bus travel in Tacoma received ratings that were much above the national benchmark and when compared to ratings in jurisdictions of similar population size (see Figure 9). While shopping opportunities were rated much above the national benchmark, ratings were much below the population size benchmark. Opportunities to attend cultural activities also received ratings that were much above the national average, but when compared to ratings given in jurisdictions of similar population size, Tacoma's ratings were similar to the benchmark. Access to affordable, quality housing was rated above the national and similar population size benchmarks while the openness and acceptance of the community towards people of diverse backgrounds was rated similarly to the benchmarks. While the ease of rail travel in Tacoma was rated much below the national average, when compared to jurisdictions of similar population size it received ratings that were much higher. Seventeen characteristics received ratings that were below or much below the national and similar population size benchmarks.

Benchmark comparisons use the average rating (0=poor, 33=fair, 67=good, 100=excellent).

Community Participation

Another question on the survey assessed resident participation in various activities in Tacoma. At least half reported participating in most activities on one or more occasions in the past year. The vast majority of residents reported having shopped in Tacoma neighborhood business districts; dined at a Tacoma restaurant; visited downtown Tacoma; and recycled paper, cans or bottles from their homes at least once in the past year. Least participation was reported for senior programs (18% reported doing so at least once in the previous 12 months), attending a meeting of local elected officials or other local public meeting (27%) or attending a community meeting (29%).

A higher proportion of respondents in 2010 than in 2006 reported using the Internet, participating in neighborhood activities, volunteering and using the Internet to conduct business with the City of Tacoma at least once in the previous 12 months. Fewer residents reported using a bike lane or pedestrian trail in 2010 than in 2006 (see Figure 10).

Overall, a higher proportion of residents living in Districts 1 and 2 reported participating in community activities than did those living in the other areas of the City. Exceptions included riding a local bus and participating in a senior program, where District 3 residents were more likely to have done these activities than were residents living in Districts 1, 2, 4 and 5 (see Figure 11).

Tacoma residents generally reported much more participation in community activities than did residents in other jurisdictions across the country and in jurisdictions of similar population size to Tacoma (see Figure 12).

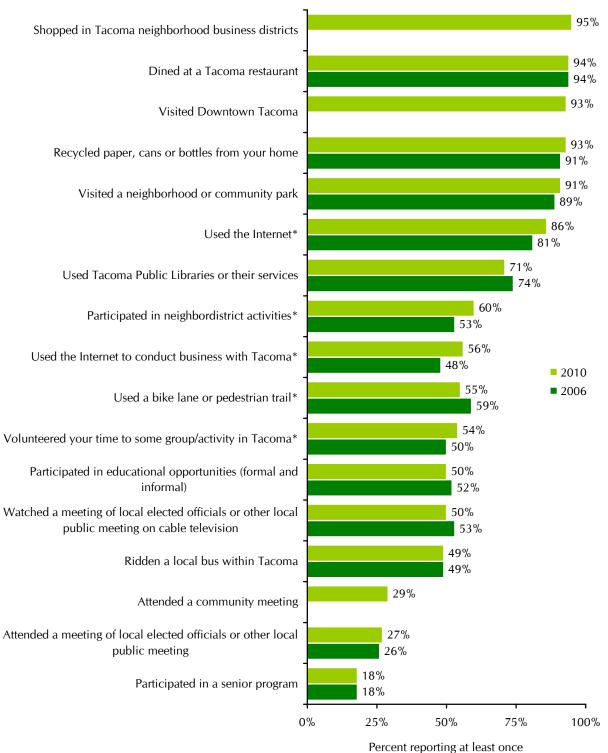

Figure 10: Community Participation Compared Over Time

*Indicates statistically significant differences between 2010 and 2006.

"Shopped in Tacoma neighborhood business districts," "Visited Downtown Tacoma" and "Attended a community meeting" were not asked in 2006.

© 2010 National Research Center, Inc.

Issues Facing the Community

Tacoma residents were asked to give their opinions about growth, safety and potential problems facing the community. Respondents viewed job opportunities and jobs growth as challenges in 2010.

Growth

Respondents were asked to rate the speed of population, retail and jobs growth in the City over the past two years. The rate of jobs growth in Tacoma was viewed as "somewhat" or "much too slow" by 90% of respondents, up from 67% in 2006. About twice as many respondents in 2010 than in 2006 thought the rate of retail growth in the City was "too slow," although the proportion reporting it as the "right amount" was somewhat similar between 2010 and 2006. Fewer survey respondents in 2010 than in 2006 rated the speed of population growth as "somewhat" or "much too fast" and 10% more in 2010 than in 2006 thought the rate of population growth was the "right amount." One in five responded with "don't know" when asked to rate jobs growth in Tacoma and 3 in 10 did not give an opinion when asked to rate the speed of population growth in Tacoma over the past two years (see *Appendix B. Complete Set of Survey Frequencies*).

District 2 residents were more likely to rate population growth as the "right amount" and District 5 residents were more likely to rate it as "too fast" when compared to responses from residents living in other Councilmanic Districts (see Figure 14). While a strong majority of respondents evaluated the speed of jobs growth as "too slow" in the City over the past two years, residents living in Districts 2 and 4 were slightly more likely to give this response than residents living in other Districts.

Assessments for the rate of growth were available for comparison to residents ratings in other communities across the nation as well as in jurisdictions of similar population size. Many more Tacoma residents rated job growth as "too slow" than residents in other communities across the nation and in communities of similar population size. Similarly, many more respondents in Tacoma assessed population growth as "too fast" than did respondents in other jurisdictions throughout the nation. Ratings of the speed of retail growth were similar to ratings in other communities across the country.

**Benchmark comparisons use the proportion rating growth as "too slow."

Potential Problems

Those completing the survey were asked to rate how much of a problem, if at all, specific issues were in the City of Tacoma. For many items, a majority of residents thought each was a "moderate" or "major" problem. About 9 in 10 residents thought that drugs and crime were "moderate" or "major" problems in Tacoma (see Figure 16). Three new items were added to the list in 2010; gangs, the availability of job opportunities and the condition of streets (potholes) were viewed as at least moderately problematic by 2010 survey respondents. The availability of neighborhood and community parks and the absence of translated communications from the City were the least likely to be considered problematic; 20% of respondents rated each as a "moderate" or "major" problem. At least one in five reported "don't know" when asked to rate how much of a problem each of the following were in Tacoma: a lack of growth (22%), the availability of bike paths (20%), environmental preservation and enhancements (28%), toxic waste or other environmental hazard (36%) and the absence of communications from the City of Tacoma translated into languages other than English (39%) See *Appendix B. Complete Set of Survey Frequencies* for the full set of frequencies.

Overall, 15 of 23 items were of slightly less concern for 2010 residents than 2006 residents. As was the case when asked to rate the speed of population growth, fewer residents in 2010 than in 2006 thought too much growth was problematic (see Figure 16). The proportion of respondents rating toxic waste or other environmental hazard as a "moderate" or "major" problem dropped significantly from 2006 to 2010 (47% in 2006 versus 34% in 2010). More respondents in 2010 than in 2006 felt lack of growth was at least a "moderate" problem.

District 5 residents were more likely to think that too much growth was a "moderate" or "major" problem in Tacoma and less likely to rate a lack of growth as problematic when compared with responses from residents living in other areas of the City (see Figure 17).

Figure 17: Potential Problems Compared by Councilmanic Districts

Percent reporting as a "moderate" or "major" problem.

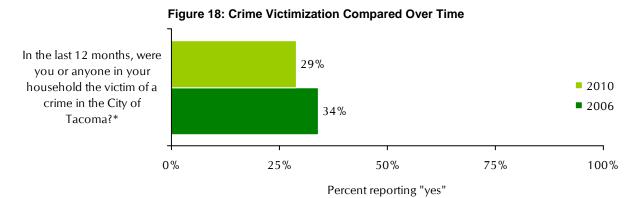

Grey shading indicates statistically significant differences between subgroups.

Safety

The survey included several questions pertaining to safety in the City. Responses indicated that residents generally feel safer in 2010 than they did in 2006. The proportion of respondents reporting that they had been a victim of a crime in the City of Tacoma in the previous 12 months decreased from 2010 to 2006 (29% versus 34%). Of the 29% who said they had been a victim of a crime in Tacoma in the last 12 months, about three-quarters of those respondents said they reported it.

When comparing responses by Councilmanic Districts, there were no significant differences in self reported crime victimization.

When compared to victimization reporting in other jurisdictions across the country and in jurisdictions of similar population size, Tacoma residents were much more likely to report being a victim of a crime, but less likely to have actually reported the crime to authorities.

*Indicates statistically significant differences between 2010 and 2006.

Figure 19: Crime Victimization Compared by C	Councilmanic Districts
----------------------------------------------	------------------------

	District 1	District 2	District 3	District 4	District 5	Overall results
In the last 12 months, were you or anyone in your household the victim of a crime in the City of Tacoma?	25%	27%	30%	30%	30%	29%

Percent reporting "yes.

A higher proportion of respondents in 2010 than in 2006 said that they felt "somewhat" or "very" safe in Tacoma (49% versus 42%). About one in five said they felt "neither safe nor unsafe" in Tacoma and 3 in 10 reported feeling "unsafe" in the City.

Residents living in Districts 1 and 2 were more likely to feel safe in Tacoma than were those living in Districts 4 and 5.

Tacoma residents were much less likely to report feeling safe in the City when compared to responses from residents in other jurisdictions across the county and of similar population size to Tacoma.

Percent reporting "somewhat safe" or "very safe."

Grey shading indicates statistically significant differences between subgroups.

While fewer than half of respondents reported feeling "safe" from violent crime and property crime in Tacoma, a higher proportion of respondents in 2010 than in 2006 gave ratings of "very" or "somewhat" safe to both of these types of crime. However, self-reported safety ratings were below or much below the national and similar population size benchmarks.

Those living in Districts 1 and 2 were more likely to feel safe from crime than were those living in other areas of the city.

Please rate how safe you feel from the following occurring to you in Tacoma:	Very safe	Somewhat safe	Neither safe nor unsafe	Somewhat unsafe	Very unsafe	Total	National comparison	Population 100,000 to 350,000 comparison
Fire	29%	37%	26%	7%	2%	100%	much below	below
Violent crime (e.g., rape, assault, robbery)	11%	33%	23%	26%	8%	100%	much below	much below
Property crime (e.g., burglary, theft)	5%	24%	20%	32%	19%	100%	much below	much below

Benchmark comparisons use the average rating (0=very unsafe, 25=somewhat unsafe, 50=neither safe nor unsafe, 75=somewhat safe, 100=very safe).

When asked to evaluate their feelings of safety in their neighborhood and in downtown Tacoma at various times of day, it was clear that residents felt safer during the day than at night. A strong majority reported feeling "somewhat" or "very" safe in their neighborhood during the day and 7 in 10 gave similar reports for feelings of safety in Tacoma's downtown area during the day. Of the four scenarios, residents were least likely to feel safe in Tacoma's downtown area at night (20% felt "safe" downtown at night versus 69% feeling "safe" there during the day). In fact, about six times as many respondents said they felt "very unsafe" in downtown Tacoma at night than did those who reported they felt "very safe" in that area at night.

Residents from Districts 3, 4 and 5 tended to feel less "safe" at night than did those living in Districts 1 and 2 (see Figure 27).

While results were much below the national and similar population size benchmarks, safety ratings appear to be improving over time (see Figure 26).

Evaluations of Tacoma Services

In addition to asking Tacoma residents to evaluate 34 services, the survey sought resident opinions about the overall quality of services provided by Tacoma as well as services provided by other government entities.

Overall Quality of Services

Just over half of respondents rated the overall quality of services in Tacoma as "good" or "excellent," similar to responses given in 2006; 40% rated overall service quality as "fair." These ratings were much below national and similar population size average ratings.

When compared by Councilmanic Districts, results indicated that residents living in Districts 1 and 2 tended to give more favorable ratings to the overall quality of services than did those living in other areas of the community.

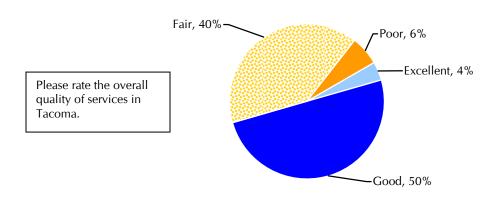

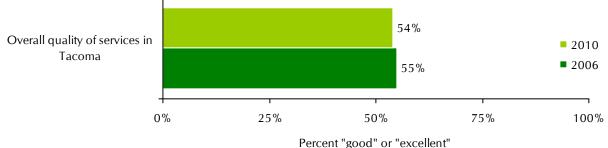

Figure 29: Overall Quality of Services

Figure 30: Overall Quality of Services Compared Over Time

Grey shading indicates statistically significant differences between subgroups.

Figure 31: Overall Quality of Services Compared by Councilmanic District

Please rate the overall quality of services in Tacoma.	District 1	District 2	District 3	District 4	District 5	Overall results
Please rate the overall quality of services in						
Tacoma.	59%	59%	51%	48%	51%	54%

Percent reporting "good" or "excellent."

Slightly more than half of respondents rated the overall services in Tacoma as "good" or "excellent" and fewer than half rated the quality of County, State and Federal services with positive marks. While the proportion of respondents rating the overall services provided by the State as "good" or "excellent" slightly decreased from 2006 to 2010, residents gave more favorable ratings to overall services provided by the Federal government in 2010 than in 2006.

Residents living in District 4 generally gave less favorable ratings than did those living in the other Districts.

When compared to overall service evaluations by residents living in other jurisdictions across the country and in jurisdictions of similar population size, Tacoma ratings were below or much below the benchmarks.

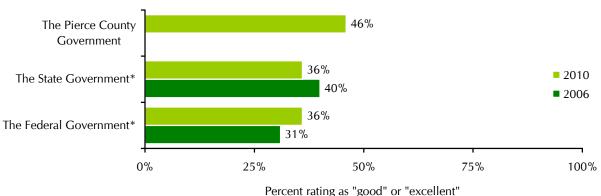

Figure 32: Overall Quality of Services Provided by County, State and Federal Government Compared Over Time

*Indicates statistically significant differences between 2010 and 2006. The Pierce County Government was not asked in 2006.

Overall, how would you rate the quality of the services provided by each of the following?	Excellent	Good	Fair	Poor	Total	National comparison	Population 100,000 to 350,000 comparison
The Pierce County Government	4%	41%	42%	12%	100%	much below	much below
The State Government	4%	32%	41%	23%	100%	much below	much below
The Federal Government	5%	31%	39%	25%	100%	much below	below

Benchmark comparisons use the average rating (0=poor, 33=fair, 67=good, 100=excellent).

Service Ratings

Of the 34 services rated by 2010 survey respondents, 17 were rated as "good" or "excellent" by half or more residents (see Figure 35: Services Ratings Compared Over Time). About 9 in 10 survey participants rated fire services as "good" or better and a similar proportion (87%) rated emergency medical services with positive scores, similar to 2006 ratings. Similar to 2006, garbage collection, recycling and yard waste pick up received "good" or "excellent" ratings by 8 in 10 respondents. Code enforcement, sidewalk maintenance and street repair were viewed least positively in 2010, as was the case in 2006. For a number of services, 20% or more of respondents gave a "don't know" response when asked to rate the quality of each one: snow removal (21%); bus/transit services (28%); land use, planning and zoning (33%); code enforcement (23%); animal control (20%); support for local businesses (30%); services to seniors (46%); services to youth (41%); services to low-income people (38%); municipal courts (44%); TV Tacoma Channel 12 (43%); and Tacoma Public Schools (27%). For a complete set of responses for all survey questions, including "don't know" responses, please see *Appendix B. Complete Set of Survey Frequencies*).

Of the 19 services where there were significant differences between 2010 and 2006 ratings, 16 services received more favorable ratings in 2010 than in 2006 (see Figure 35). For three services (information received from the city, bus/transit services and snow removal), the proportion of residents giving an "excellent" or "good" rating decreased from 2006 to 2010, although it should be noted that "information received from the city" was worded as "public information" in 2006. Police services, storm drainage, crime prevention and code enforcement saw increases of 10% or more.

In general, residents living in Districts 1 and 2 were more likely to rate services with "good" or "excellent" ratings than were those living in Districts 3, 4 and 5 (see Figure 36).

When compared to national averages, 5 of the 34 services rated by survey respondents were rated above or much above the overall benchmark (see Figure 37):

- garbage collection
- recycling
- yard waste pick up
- TV Tacoma Channel 12
- bus/transit services

Six services received ratings that were similar to the national benchmark:

- fire services
- emergency medical services
- bill payment services for utilities
- sewer services
- storm drainage
- support for local businesses

Twenty-two were rated below or much below the national average:

- neighborhood and community parks
- maintenance of neighborhood and community parks
- police services
- drinking water
- traffic enforcement
- services to seniors
- municipal courts
- animal control
- information received from the city
- Tacoma Public Schools

- services to youth
- crime prevention
- land use, planning and zoning
- services to low-income people
- street cleaning
- snow removal
- traffic signal timing
- public parking
- code enforcement (weeds, abandoned buildings, etc.)
- sidewalk maintenance
- street repair

street lighting

Seven of 31 Tacoma services compared to the custom benchmark (jurisdictions with a similar population size to Tacoma) were above or much above average:

- sewer services
- garbage collection
- recycling
- yard waste pick up
- TV Tacoma Channel 12
- bus/transit services
- fire services

Five were similar to the custom benchmark:

- neighborhood and community parks
- services to low-income people
- emergency medical services
- storm drainage
- support for local businesses

Eighteen Tacoma services received ratings that were below or much below ratings given in other jurisdictions with a similar population to Tacoma:

- police services
- drinking water
- traffic enforcement
- services to seniors
- municipal courts
- animal control
- information received from the city
- Tacoma Public Schools
- street lighting
- services to youth

- crime prevention
- street cleaning
- snow removal
- traffic signal timing
- code enforcement (weeds, abandoned buildings, etc.)
- sidewalk maintenance
- street repair
- land use, planning and zoning

Benchmark comparisons use the average rating (0=poor, 33=fair, 67=good, 100=excellent).

Key Driver Analysis

Knowing where to focus limited resources to improve residents' opinions of local government requires information that targets the services that are most important to residents. However, when residents are asked what services are most important, they rarely stray beyond core services – those directed to save lives and improve safety.

In market research, identifying the most important characteristics of a transaction or product is called Key Driver Analysis. The key drivers that are identified from that analysis do not come from asking customers to self-report which service or product characteristic most influenced their decision to buy or return, but rather from statistical analyses of the predictors of their behavior. When customers are asked to name the most important characteristics of a good or service, responses often are expected or misleading – just as they can be in the context of a citizen survey. For example, air travelers often claim that safety is the primary consideration in their choice of an airline, yet key driver analysis reveals that frequent flier perks or in-flight entertainment predicts their buying decisions.

In local government, core services – like fire protection – invariably land at the top of the list created when residents are asked about the most important services. And core services are important. But by using Key Driver Analysis, our approach digs deeper to identify the less obvious, but more influential services that are most related to residents' ratings of overall quality of local government services. Because services focused directly on life and safety remain essential to quality government, it is suggested that core services should remain the focus of continuous monitoring and improvement where necessary – but monitoring core services or asking residents to identify important services is not enough.

A Key Driver Analysis (KDA) was conducted for the City of Tacoma by examining the relationships between ratings of each service and ratings of the City of Tacoma's overall services. Those key driver services that correlated most highly with residents' perceptions about overall service quality have been identified. By targeting improvements in key services, the City of Tacoma can focus on the services that have the greatest likelihood of influencing residents' opinions about overall service quality.

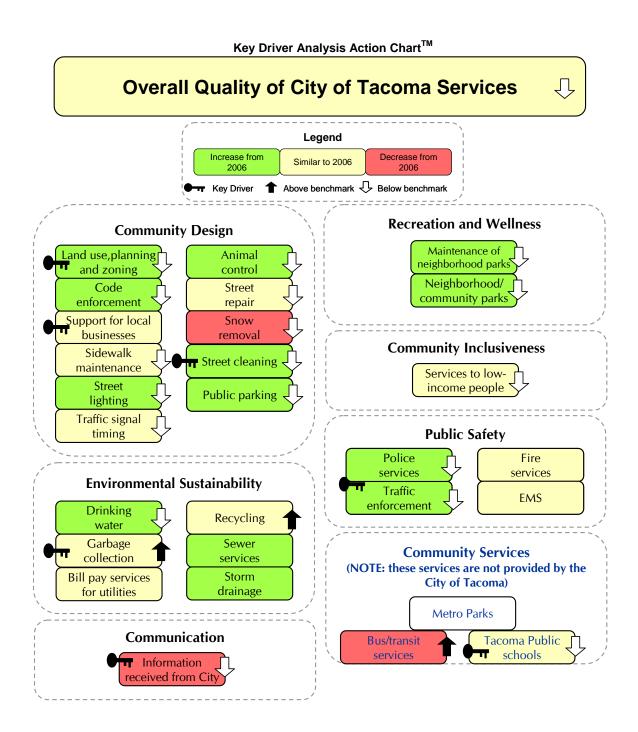

The 2010 City of Tacoma Action Chart[™] on the following page combines three dimensions of performance:

- Trendline data. When a comparison is available, the background color of each service box indicates whether the service is higher than in 2006 (green), similar to 2006 ratings (yellow) or lower than in 2006 (red).
- Comparison to the national benchmark. The arrows next to service boxes point up (black arrow) or down (white arrow) to indicate comparisons to the national benchmark. No arrow indicates that the survey was similar to the benchmark.
- Identification of key drivers. A black key icon next to a service box notes a key driver.

Thirty services were included in the KDA for the City of Tacoma. Seven of these services were identified as key drivers for the City: land use, planning and zoning; support for local businesses; street cleaning; garbage collection; Tacoma Public Schools; information received from the City; and police services. All but two of the key drivers - support for local businesses (similar to the national average) and garbage collection (above the national benchmark) – were rated below the national average.

Considering all performance data included in the Action Chart, a jurisdiction typically will want to consider improvements to any key driver services that are trending down (e.g., information received from the City) or that are not at least similar to the benchmark (land use, planning and zoning; street cleaning; Tacoma Public Schools; information received from the City; and police services).

Services with a high percent of respondents answering "don't know" (i.e., more than 40%) were excluded from the analysis and were considered services that would be less influential. See *Appendix B. Complete Set of Survey Frequencies* for the percent reporting "don't know" for each service.

Public Works Services

The survey included a question that asked residents which Public Works services should receive the most emphasis. As shown in Figure 38 below, about three-quarters of respondents thought emphasis should be placed on street repairs. About 1 in 10 or fewer selected other options for emphasis.

Respondents in all Districts wanted street repair to receive the most emphasis. Those living in Districts 4 and 5 were more likely than residents in other Districts to want emphasis placed on traffic calming devices (speed humps, traffic circles).

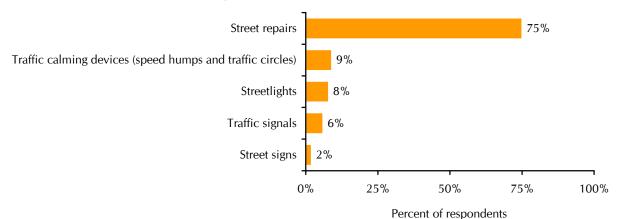

Figure 38: Public Works Services

Which of the following Public Works services do you think should receive the most emphasis? (Select only one.)	District 1	District 2	District 3	District 4	District 5	Overall results

Tacoma City Government

Residents who reported having had contact with a City of Tacoma in the 12 months prior to the administration of the 2010 survey also were asked to rate their impression of the City employee in their most recent contact. Survey participants also were asked to rate government performance, overall.

Contacting the City

About the same proportion of residents in 2010 as in 2006 reported contacting a City of employee either in-person or via phone contact. While fewer Tacoma residents reported contacting the City in the previous 12 months than did residents living in other jurisdictions across the nation, contact was similar to the custom benchmark (jurisdictions of similar population). There were no significant differences for comparisons by Councilmanic Districts.

	District 1	District 2	District 3	District 4	District 5	Overall results
In the last 12 months, have you had any in-person or phone contact with an employee of the City of Tacoma?	52%	49%	48%	53%	46%	50%

Percent reporting "yes."

Of the 50% of respondents who had contact with a City employee in the prior 12 months, about three-quarters rated employee knowledge and courtesy as "good" or "excellent." Approximately 7 in 10 reported employee responsiveness as "good" or better and a similar proportion gave favorable ratings when asked to rate their overall impression of the employee. Making residents feel valued received the least favorable ratings (63% gave a "good" or "excellent" rating). For the most part, 2010 employee ratings were similar to ratings given in 2006 with the exception of "courtesy," which received slightly higher ratings in 2010.

Compared to residents in other Districts, those in District 4 were less likely to give favorable ratings for employee courtesy and their overall impression of the employee with whom they had contact.

Compared to national averages, Tacoma City employees were rated below or much below average; ratings were similar to or below the custom benchmarks.

This question was asked only of those who had contact with a City employee in the last 12 months. Benchmark comparisons use the average rating (0=poor, 33=fair, 67=good, 100=excellent).

Overall Performance of Tacoma City Government

Nearly half of all respondents rated the overall performance of the Tacoma City government as "good" or "excellent" and two in five said it was "fair." About 1 in 10 gave a "poor" rating.

Residents living in Districts 1 and 2 were more likely to give positive ratings than were those living in other Councilmanic Districts.

Ratings were similar to 2006 and much below the national average. A comparison to jurisdictions of a similar population size to Tacoma was not available.

Public Trust Ratings

Respondents were asked to indicate the extent to which they agreed or disagreed with various statements about Tacoma City government. Half or nearly half of residents "somewhat" or "strongly" agreed that Tacoma City government welcomes citizen involvement and that they are pleased with the overall direction the City is taking. About twice as many respondents "strongly" disagreed than "strongly" agreed that they receive good value for the City taxes they pay, that government operates for the benefit of all the people, that they can easily determine who they need to talk to when they have a concern or issue with the City and that most Tacoma elected officials care what people like me think. Note that about a quarter of respondents reported "don't know" when asked whether or not they agree that Tacoma City government welcomes citizen involvement (see *Appendix B. Complete Set of Survey Frequencies*).

"I am well informed on major issues in Tacoma" and "I am pleased with the overall direction that the City is taking" saw slight decreases in ratings from 2006 to 2010, while "I receive good value for the City taxes I pay" saw a small increase from 2006 to 2010 in the proportion agreeing with this statement.

Those living in Districts 1 and 2 were more likely to agree that they received good value for the City taxes they pay and that the government operates for the benefit of all the people than were those living in other areas of the community.

Planning Ratings

When asked the extent to which they agreed or disagreed with various statements about Tacoma's land use and planning, nearly half (47%) of 2010 survey respondents reported that they were pleased with the design of commercial development in Tacoma, down from 53% in 2006. A new item was added to the list in 2010 ("I am satisfied with Tacoma's business licensing services"); 35% of respondents "somewhat" or "strongly" agreed with this statement. Nearly 3 in 10 respondents said "don't know" when asked if they think Tacoma's environmentally sensitive areas are well protected and about half (49%) responded with "don't know" when asked to state their satisfaction with Tacoma's business licensing services (see *Appendix B. Complete Set of Survey Frequencies*).

Percent reporting "somewhat agree" or "strongly agree."

Property Tax Allocation

The City of Tacoma receives about 20% of total annual property taxes. When informed that their property tax is divided among many government agencies and asked what percentage of the total tax they thought went to the City of Tacoma, about half said they did not know, similar to 2006 responses. One-quarter said "10% to 20%" and about 1 in 10 said "25% to 50%" and 1 in 20 said "more than 50%."

Public Information

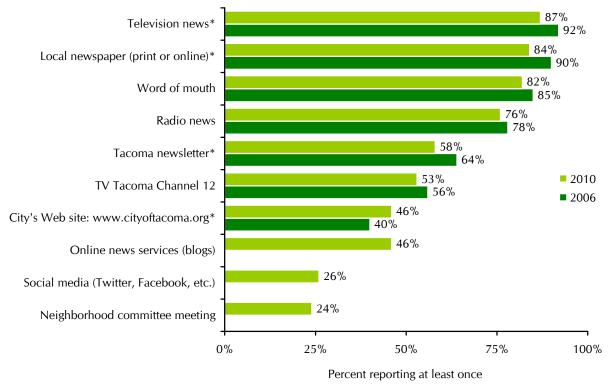

The 2010 Citizen Survey included a set of questions about public information sources. Television news, the local newspaper and word of mouth continue to be the most commonly used information resources.

Public Information Sources

Although television news was viewed at least once in the prior 12 months by 87% of respondents, there was a slight decrease in use from 2006 to 2010 (92% versus 87%). Residents were least likely to use a neighborhood committee meeting to obtain information about the City of Tacoma.

Online news services, social media and neighborhood committee meetings were added to the list of potential information sources in 2010. Nearly half of respondents reported using online news services to get information about Tacoma and about a quarter said they've used social media and the neighborhood committee meetings at least once in the past 12 months; however, half or more respondents reported "never" using these sources.

A smaller percentage of District 1 respondents reported going to a neighborhood meeting but more had visited the City Web site (see Figure 56). A higher proportion of respondents living in District 5 said that they had used a neighborhood meeting to get news about Tacoma than respondents living in other Councilmanic Districts.

*Indicates statistically significant differences between 2010 and 2006.

"Neighborhood committee meeting," "Social media" and "Online news services" were not asked in 2006.

In the last 12 months, about how many times, if ever, have you or other household members used the following sources of information for news about Tacoma?	District 1	District 2	District 3	District 4	District 5	Overall results
Television news	90%	85%	82%	89%	88%	87%

Appendix D. Comparison of Select Questions by Respondent Characteristics

The responses by respondent sociodemographics are compared in this appendix. Responses that are significantly different (p < .05) are marked with gray shading.

Summary

Responses to the survey were somewhat predictable according to respondent age in that people 65 and older generally rated items on the survey higher than did other age groups. Exceptions included older residents giving lower ratings when asked for their opinions about the quality of life in Tacoma in the next five years and the openness and acceptance of the community towards people of diverse backgrounds, ease of travel (various modes), overall quality of new development and availability of parking downtown. Generally, older residents reported less community participation than younger residents. The youngest age group, 18-24 year olds, was less likely to think that various issues were problems in Tacoma, but more likely to experience crime victimization than older residents. Younger residents also were less likely to feel safe in the community. Residents age 25-64 were more likely to have had contact with a City employee. Younger residents were more likely to access the Internet via a mobile device.

Males tended to feel safer in Tacoma, had participated more in public meetings and rated most services higher than did females. Females tended to perceive more potential problems as issues in Tacoma than males did, but were more complimentary to all levels government.

While White residents were more likely to give positive marks for quality of life in Tacoma, non-White residents were more likely to think quality of life would improve in the next five years than were White respondents. White residents tended to give higher ratings than non-White residents when asked to rate various community characteristics; the few exceptions included the availability of parking downtown; access to affordable, quality child care; job opportunities; and business opportunities. Many perceptions of problems in Tacoma were significantly associated with race. Of the significant associations, more Whites perceived crime, vandalism, graffiti, gangs, drugs, run-down buildings and potholes as problems, while more non-Whites highlighted too much growth, the availability of neighborhood and community parks, the availability of bike paths, the absence of communications from the City of Tacoma translated into languages other than English and environmental preservation and enhancement as problems. Services, City employees and public trust generally received higher ratings from White respondents

than from non-White respondents, though a higher proportion of non-White residents than White residents agreed that they were pleased with the overall direction the City is taking.

Residents reporting they were Hispanic, Spanish or Latino tended to give higher ratings than did other residents when evaluating various community characteristics of Tacoma. While Hispanic, Spanish or Latino residents reported a higher participation rate for visiting a neighborhood or community park, using the Internet and conducting business with Tacoma online, their counterparts were more likely to have shopped in Tacoma neighborhood business districts. Hispanic, Spanish or Latino residents generally gave higher ratings to services and government performance than did residents who said they were not Hispanic, Spanish or Latino. Exceptions included ratings for Metro Parks, garbage collection, recycling and yard waste pick up. Hispanic, Spanish, Latino residents were more likely to access the Internet with a mobile device.

Appendix E. Comparison of Select Questions by Neighborhood District

The responses by Neighborhood District are compared in this appendix. Responses that are significantly different (p < .05) are marked with gray shading.

Summary

Most responses to the survey showed statistically significant differences among the various neighborhood council districts. North End, West End and Northeast council districts gave higher ratings to most of the questions on the survey compared to respondents from other neighborhood council districts. Other than this, there were few visible patterns across survey categories and neighborhood council districts.

Perceptions of problems differed from district to district, as did satisfaction with services and use of information sources.

North End, West End and Northeast council districts gave higher ratings to aspects of quality of life and many community characteristics. New Tacoma had the most optimism about quality of life improving over the next five years. North End, West End and New Tacoma generally rated the accessibility of their communities higher than did other residents, particularly those living in Central Tacoma and in Eastside. South Tacoma gave less favorable ratings for the ease of travel in Tacoma than did residents living in other areas of the City.

Residents in the South Tacoma, Eastside and South End neighborhoods were more likely to perceive potential problems as issues in Tacoma than were others residents. Higher proportions of North End and Northeast residents felt safe when compared to those living in other neighborhood districts, particularly those living in Eastside and South End neighborhoods.

South Tacoma residents were less likely to give positive scores to Tacoma services as well as to services provided by other forms of government than were residents living in other areas of the City. Respondents living in the West End, North End and the Northeast neighborhood districts tended to give higher ratings for the overall performance of the Tacoma City government.

Public trust ratings were lower among those living in the Central, South Tacoma, Eastside and South End neighborhoods than among residents living in other areas of Tacoma.

		Question	1 by Neighbo	rhood Counc	I Districts							
	Neighborhood Council Districts											
Circle the number that best represents your opinion:	West End	North End	Northeast	New Tacoma	Central	South Tacoma	Eastside	South End	Overall results			
How do you rate Tacoma as a place to live?	76%	80%	74%	66%	68%	57%	62%	58%	67%

Appendix F. Survey Methodology

Survey Instrument Development

The Tacoma Citizen Survey was administered by mail, with a Web option, in August 2010. This was the second iteration of the survey. Data for the previous iteration was collected by mail in 2006. General citizen surveys, such as this one, ask recipients their perspectives about the quality of life in the city, their use of City amenities, their opinion on policy issues facing the City and their assessment of City service delivery. The citizen survey instrument for Tacoma was developed by starting with the version from the previous implementation in 2006. For the most part, questions on the 2010 survey are identical to those on the 2006 version, with just a few minor modifications. In an iterative process between City staff and NRC staff, a final six-page questionnaire was created.

Sample Selection

For the 2010 survey, 9,600 residents were randomly selected across 14 geographic areas (see map below) within the city to receive survey mailings. To ensure households selected to participate in the survey were within the City of Tacoma boundaries, the latitude and longitude of each address was plotted to determine its location (i.e., zone) within the city. Addresses that fell outside of the city boundaries were removed from the sample. Attached units within the city were oversampled to compensate for detached unit residents' tendency to return surveys at a higher rate. An individual within each household was selected using the birthday method. (The birthday method selects a person within the household by asking the "person whose birthday has most recently passed" to complete the questionnaire. The underlying assumption in this method is that day of birth has no relationship to the way people respond to surveys.)

Tacoma Sampling Zones

Survey Administration

Households received four mailings, one week apart beginning in late July of 2010. Completed surveys were collected over a six-week period. The first mailing was a prenotification postcard announcing the upcoming survey. The following two mailings contained a letter from the Mayor, a questionnaire, and a postage-paid envelope. Residents receiving the mailings were provided the opportunity to complete the survey online instead of on paper. The fourth mailing was a follow-up reminder postcard. About 5% of the postcards were returned as undeliverable because the housing unit was vacant or the postal service was unable to deliver the survey as addressed. Of the 9,093 households that received the survey, 3,024 respondents completed the survey, 128 of which were completed online via the Web version, providing an overall response rate of 33%.

Reaching Non-English-Speaking Residents

The cover letter and survey were mailed to residents in English. The cover letters included a paragraph in Spanish that described the purpose of the survey and included a number that respondents could call to request the survey in Spanish. Two respondents requested the survey in Spanish and one completed the survey using the Spanish version.

The survey packet included a one page insert with a paragraph in four languages (Russian, Vietnamese, Korean, and Cambodian) that described the contents of the packet, and provided a phone number to call if the resident wanted to receive the survey in another language, or get assistance in completing the survey.

Weighting the Data

The surveys were analyzed using SPSS (Statistical Package for the Social Sciences.) The demographic characteristics of the survey sample for each of the five Councilmanic Districts were compared to those found in the 2000 Census estimates provided by the City and were statistically adjusted to reflect the larger population for each district when necessary. Other discrepancies between the whole population and the sample were also aided by the weighting due to the intercorrelation of many socioeconomic characteristics.

The variables used for weighting were housing tenure (rent versus own), race, ethnicity, age gender and Councilmanic District. This decision was based on:

- The disparity between the survey respondent characteristics and the population norms for these variables
- The magnitude of differences of opinion among these subgroups
- The weighting, if any, done in prior years

The primary objective of weighting survey data is to make the survey sample reflective of the larger population of the community. This is done by: 1) reviewing the sample demographics and comparing them to the population norms from the Census and 2) comparing the responses to different questions for demographic subgroups. The percentage of residents with demographic characteristics that are least similar to the percentages in the Census and the demographic categories of residents whose opinions are most different from each other are the

best candidates for data weighting. A third criterion sometimes used is the importance that the community places on a specific variable. For example, if a jurisdiction feels that accurate race representation is key to staff and public acceptance of the study results, additional consideration will be given in the weighting process to adjusting the race variable.

The results of the weighting scheme are presented in the table on the following page.

City of Tacoma 2010 Citizen Survey Weighting Table																		
	Population Norm ¹						Unweighted Data					Weighted Data

Age=18+; gender, ethnicity and race is total population; tenure is out of total households/occupied units

Data Analysis

The surveys were analyzed using the Statistical Package for the Social Sciences (SPSS). Frequency distributions are presented in the body of the report. Chi-square and ANOVA tests of significance were applied to breakdowns of selected survey questions by respondent characteristics. A "p-value" of 0.05 or less indicates that there is less than a 5% probability that differences observed between groups are due to chance; or in other words, a greater than 95% probability that the differences observed in the selected categories of the sample represent "real" differences among those populations. Where differences between subgroups are statistically significant, they are marked with grey shading in tables.

Appendix G. Jurisdictions Included In Benchmark Comparisons

Listed below are the jurisdictions included in the National comparisons provided for the City of Tacoma followed by the 2000 population according to the U.S. Census. At the end of this section are listed the jurisdictions included in the similar population size (100,000 to 350,000) comparison.

Appendix I. Survey Materials

The prenotification and reminder postcards, the cover letters and translated information page, and English and Spanish versions of the survey instrument mailed to respondents appear on the following pages.

Dear Tacoma Resident,

Your household has been selected at random to participate in a survey about the City of Tacoma. You will receive a copy of the survey next week in the mail with instructions for completing and returning it. Thank you in advance for helping us with this important study.

Sincerely,

Marilyn Strickland, Mayor City of Tacoma

August 2010

Dear City of Tacoma Resident,

The City of Tacoma wants to know what you think about your community and local government. That is why you have been randomly selected to participate in the City of Tacoma 2010 Citizen Survey.

En este documento la Ciudad le da a usted una gran oportunidad para decirnos lo que piensa de los servicios de la Ciudad, y su opinión de la calidad de vida aquí en Tacoma. Se seleccionó su hogar al azar para participar en este questionnario. Si usted no puede completar el questionnario incluido en inglés, por favor llámenos al número (877) 467-2462x110 para pedir una copia del questionnario en español. Todas sus respuestas son completamente confidencial. ¡Deseamos sus opiniones! Por favor entre gue el questionario en el sobre. Muchas gracias.

Please fill out the enclosed Citizen Survey – it will take about 10-15 minutes to complete. Your answers will help the City government make decisions that affect your community. You should find the questions interesting and we will definitely find your answers useful. Please participate!

To get a scientifically reliable sample of Tacoma residents, the adult (anyone 18 years or older) in your household who most recently had a birthday should complete this survey. Year of birth of the adult does not matter.

Please have the appropriate member of the household spend a few minutes to answer all the questions and return the survey in the enclosed postage-paid envelope. Your household has been selected at random to participate in this survey and your responses will remain completely confidential and will be reported in a group form only.

You may complete the survey online if you would prefer, at: <u>http://www.n~r~c.com/survey/tacoma.htm</u>.

Your participation in this survey is very important – especially since your household is one of only 9,600 households being surveyed. If you have any questions about this survey, please contact Karrie Spitzer, Community Relations Specialist, at (253) 591-5790.

Please help us make Tacoma a great place to live. Thank you for your help and participation.

Sincerely,

Man Sumuto

Marilyn Strickland, Mayor City of Tacoma

August 2010

Dear City of Tacoma Resident,

About two weeks ago we sent you the enclosed survey, which asks for your opinion about how things are going in Tacoma. If you already completed the survey and returned it, we thank you and ask you to disregard this letter. **Do not complete the survey a second time.**

If you haven't had a chance to get to the survey, please do complete it now. We are very interested in obtaining your input.

타코마 시(City of Tacoma)에서 귀하께서 시의 서비스 시행에 대해 어떻게 생각하시는지 그리고 이곳 타코마에서의 삶의 질을 어떻게 보시는지에 대해 귀하의 의견을 밝히실 수 있는 중요한 기회를 드립니다. 본 설문조사 참여를 위해 귀 가정은 무작위로 선택되셨습니다. 동봉된 설문지가 영어로 되어 있어서 수행하실 수 없다면, 가족이나 친구의 도움을 받아 질문들을 번역하셔서 설문조사에 응해 주시길 바랍니다. 또한, 시민 설문조사(Citizen Survey)의 번역에 도움을 원하시면, 타코마 커뮤니티 하우스(Tacoma Community House)에서 도움을 받으실 수 있습니다. 타코마 커뮤니티 하우스 주소: 1314 S. L St., Tacoma, WA 98405, 전화 번호: (253) 383-3951, 웹사이트: <u>www.tacomaliteracy.org</u>. 응답하신 모든 사항은 완전하게 비밀이 유지되며 종합한 데이터의 형태로만 보고될 것입니다. 저희는 귀하의 의견을 알고 싶습니다! 작성하신 설문지는 동봉한 요금선납 봉투에 넣어서 보내 주십시오. 감사합니다.

Thành phố Tacoma cho quý vị một cơ hội quan trọng để cho chúng tôi biết quý vị nghĩ sao về dịch vụ mà Thành Phố thực hiện và thấy đời sống tại Tacoma có chất lượng như thế nào. Gia đình của quý vị được chọn ngẫu nhiên để tham gia vào cuộc khảo sát này. Nếu không thể hoàn tất bản câu hỏi bằng tiếng Anh, chúng tôi khuyên quý vị nên yêu cầu một người trong gia đình hoặc một người bạn giúp đỡ phiên dịch để điền bản khảo sát này. Đồng thời, nếu quý vị muốn được giúp đỡ để phiên dịch Bản Khảo Sát Công Dân (Citizen Survey), thì Tacoma Community House là nơi địa phương có thể giúp đỡ. Tacoma Community House, 1314 S. L St., Tacoma, WA 98405, (253) 383-3951, <u>www.tacomaliteracy.org</u>. Tất cả các câu trả lời của quý vị hoàn toàn được giữ kín đáo và sẽ được báo cáo theo từng nhóm. Chúng tôi muốn biết ý kiến của quý vị! Xin gởi lại bản khảo sát này trong bao thư đính kèm đã dán sẵn tem. Xin cám ơn quý vị.

If you would like assistance with translating the Citizen Survey, the Tacoma Community House is a local resource. Tacoma Community House, 1314 S. L St., Tacoma, WA 98405, (253) 383-3951, www.tacomaliteracy.org.

City of Tacoma 2010 Citizen Survey

Please complete this questionnaire if you are the adult (age 18 or older) in the household who most recently had a birthday. The adult's year of birth does not matter. Your responses are confidential and will be reported in group form only. Thank you.

Community and Services

1. Circle the number that best represents your opinion:

Excelle	<u>ent</u> <u>Good</u>	<u>Fair</u>	Poor	<u>Don't know</u>
How do you rate Tacoma as a place to live?	2	3	4	5
How do you rate your neighborhood as a place to live?1	2	3	4	5
How do you rate Tacoma as a place to raise children?	2	3	4	5
How do you rate Tacoma as a place to retire?1	2	3	4	5
How do you rate the overall quality of life in Tacoma?1	2	3	4	5

2. Do you think the quality of life in Tacoma is likely to improve, stay the same, or decline over the next 5 years?

□ Improve a lot □ Improve slightly □ Stay the same □ Decline slightly □ Decline a lot

3. Please rate each of the following characteristics as they relate to Tacoma as a whole:

Excellent	Good	Fair	Poor	<u>Don't know</u>
Sense of community1	2	3	4	5
Openness and acceptance of the community towards people of				
diverse backgrounds1	2	3	4	5
Overall appearance of Tacoma1	2	3	4	5
Opportunities to attend cultural activities1	2	3	4	5
Shopping opportunities1	2	3	4	5
Air quality1	2	3	4	5
Availability of social services programs (e.g., for children, families and seniors). 1	2	3	4	5
Job opportunities 1	2	3	4	5
Business opportunities1	2	3	4	5
Educational opportunities1	2	3	4	5
Cleanliness of the private properties in your neighborhood1	2	3	4	5
Overall condition of your neighborhood (streets, sidewalks, lighting, etc.)1	2	3	4	5
Accessibility of City facilities for persons with disabilities1	2	3	4	5
Convenient access to neighborhood and community parks1	2	3	4	5
Access to affordable, quality housing1	2	3	4	5
Access to affordable, quality child care1	2	3	4	5
Access to affordable, quality health care1	2	3	4	5
Access to affordable, quality food1	2	3	4	5
Ease of car travel in Tacoma1	2	3	4	5
Ease of bus travel in Tacoma1	2	3	4	5
Ease of rail travel in Tacoma1	2	3	4	5
Ease of bicycle travel in Tacoma1	2	3	4	5
Ease of walking in Tacoma1	2	3	4	5
Overall image/reputation of Tacoma1	2	3	4	5
Overall quality of new development in Tacoma1	2	3	4	5
Availability of parking downtown1	2	3	4	5

4. Please rate the speed of growth in the following categories in Tacoma over the past 2 years:

	Much	Somewhat	Right	Somewhat	Much	Don't
	too slow	too slow	<u>amount</u>	<u>too fast</u>	<u>too fast</u>	<u>know</u>
Population growth	1	2	3	4	5	6
Retail growth (i.e., stores, restaurants, etc.)	1	2	3	4	5	6
Job growth	1	2	3	4	5	6

5. In the last 12 months, about how many times, if ever, have you or other household members participated in the following activities in Tacoma?

	1~2	3~12	13~26	More than
Never	<u>times</u>	<u>times</u>	<u>times</u>	26 times
Used Tacoma Public Libraries or their services 1	2	3	4	5
Visited a neighborhood or community park 1	2	3	4	5
Ridden a local bus within Tacoma	2	3	4	5
Attended a meeting of local elected officials or other local public meeting 1	2	3	4	5
Watched a meeting of local elected officials or other local public				
meeting on cable television 1	2	3	4	5
Recycled paper, cans or bottles from your home 1	2	3	4	5
Volunteered your time to some group/activity in Tacoma 1	2	3	4	5
Used the Internet 1	2	3	4	5
Used the Internet to conduct business with Tacoma 1	2	3	4	5
Used a bike lane or pedestrian trail 1	2	3	4	5
Participated in a senior program	2	3	4	5
Dined at a Tacoma restaurant 1	2	3	4	5
Participated in neighborhood activities 1	2	3	4	5
Participated in educational opportunities (formal and informal) 1	2	3	4	5
Shopped in Tacoma neighborhood business districts 1	2	3	4	5
Visited Downtown Tacoma 1	2	3	4	5
Attended a community meeting 1	2	3	4	5

6. To what degree, if at all, are the following problems in Tacoma:

$\begin{array}{c ccccccccccccccccccccccccccccccccccc$		Not a	Minor	Moderate	Major	Don't

Dear Tacoma Resident,

We want to hear from you! Recently, your household should have received a questionnaire asking what you think about the services you receive from the City of Tacoma.

If you have already completed the survey, we thank you. If you have not yet had a chance to do so, we urge you to take a few minutes to answer the questionnaire. Your time and responses are greatly appreciated.

All information you share will remain anonymous. If you need another copy of the questionnaire mailed to you, please call (253) 591-5790. You may complete the survey online if you would prefer, at <u>http://www.n-r-c.com/survey/tacoma.htm</u>. Thank you for helping us with this important project.

Sincerely,

Marilyn Strickland, Mayor City of Tacoma
