CITY OF TACOMA

Office of Management & Budget

TO:

Fiscal Sustainability Task Force

FROM:

Andy Cherullo, Finance Director, and Tadd Wille, Budget Officer

SUBJECT:

RESPONSE TO TASK FORCE QUESTIONS

DATE:

August 7, 2013

This correspondence provides answers to questions that have arisen from Task Force Members since the first Task Force meeting on June 19, 2013. A majority of the following questions are from the Task Force meetings on July 10 and July 24. During these meetings, staff presented overviews on both the City's Expenses and Revenues. Please let staff know if you have any additional questions.

2003-2008 Expenditure Increase

Task Force members requested a detail report on the increase in expenses between 2003 and 2008.

Staff provided an initial response at the July 24, meeting. Additional detail on the expenditure increases in shown on Attachment 1. Attachment 1 reviews the changes in actual expenditures by department and by cost category from 2003-2014. Additionally, the attachment shows the change in the number of Full Time Equivalents (FTEs) by department between the budget periods.

Utility Rates

The Task Force asked if the utility rate information (from Gross Earnings Tax Presentation) included all of the additional fees charged by other jurisdictions and Tacoma Public Utilities?

The comparison information on the utility rates of Tacoma compared to other jurisdictions is all-inclusive. They compare what Tacoma Power charges for its full bill including energy, delivery, and the customer charge (and taxes are embedded too). The comparative utility costs are normalized to show as if the same services were provided in Tacoma and subject to the same taxes that would apply to Tacoma Power. The Task Force mentioned Low Income Assistance in their discussion. Attachment 2 is a handout on the Low Income Assistance Program.

Quarterly Financial Report

The Task Force requested that staff provide electronic copies of the most recent quarterly budget update as soon as it is available.

Staff sent the quarterly budget information in an email on August 5. Staff will provide a brief presentation on the quarterly financial report at the August 7 meeting. Additionally, Attachment 3 includes a copy of the Second Quarter Financial Report.

Assumptions in the 2015-2018 Projection

Task Force members asked for a summary of the assumptions used to develop the 2015-2018 projection.

At the Task Force's first meeting, staff provided an overview of the 2015-2018 projection. Slides 19 through 27 provide an overview of the assumptions in the 2015-2018 projection. Staff provided a summary of the assumptions in the Recap of Major Expenses and Revenues handout. This handout is included in the August 7 packet and will be reviewed as part of item 7 on the August 7 agenda.

Tax Exemption for Multi-Family and Historic Properties

Task Force members requested additional information on the Multi-Family Tax Exemption program. Specifically the Task Force asked the following questions: What is the impact on property taxes from the 8 and 10 year tax exemptions offered to multi-family housing developers? Are we seeing any payback? How are property tax estimates impacted by these properties returning to the tax rolls? What was the rationale for the property tax exemption for multi-family housing?

The City of Tacoma has two types of property tax exemptions, the Multi-Family Properties exemption and the Historic Rehabilitation exemption.

The City of Tacoma Multi-Family Property Tax Exemption Program is designed to encourage development of market rate and affordable housing. Attachment 4 includes a description of the Multi-Family Property Tax Exemption and an overview of all of the properties currently in the Multi-Family Property Tax Exemption program.

By year 2021, the City of Tacoma anticipates 92 tax exempt multi-family developments coming onto the property tax roll. The assessed values shown in the attachment are for 2012. These assessed values could change when the properties come on the tax rolls, which would change the amount of property tax collected by the City.

The City of Tacoma Historic Rehabilitation Property Tax Exemption Program is designed to encourage restoration and reuse of historic structures. Attachment 5 is a description of the Historic Rehabilitation Property Tax Exemption Program.

Legislative Intent of the Gross Earnings Tax Limit

The Task Force requested information on the legislative intent on the state statute that requires a vote before gross earnings taxes can be raised above 6% on electricity, natural gas and telephone utilities.

The tax rate was set in ESB 4972, passed by the Legislature in 1982. The bill which enacted RCW 35.21.870 was ESB 4972, an initiative of the Association of Washington Cities to bring some additional revenue to local government. The bill was passed along with a number of other tax proposals that both standardized and limited the tax rates cities and towns could charge businesses. While the proposal included an additional half-cent sales tax and a new real estate excise tax and created a sales tax equalization program for sales tax poor cities, it also caped on nearly all local government tax rates, rolled backs the rates on utilities, banned the imposition of impact fees (known as "development fees" back then), and imposed requirements for referendum on any councilmanic tax increases.

Revenue Composition of Other Jurisdictions

The Task Force requested a comparison of the revenue composition of other jurisdictions.

Staff reviewed the Budget documents for the Bellevue, Seattle, Tacoma, Olympia, Fife, Spokane, Lakewood, Federal Way, Puyallup and Vancouver. Attachment 6 provides a summary of the composition of the cities' general fund revenues based on major revenue sources. Attachment 6 includes links to the budget documents of the comparison cities:

Low Income Assistance - Tacoma Power

August 2013

Many Programs Available - There are several programs available to low income customers which offer opportunities to lighten the load of utility bills. Examples include:

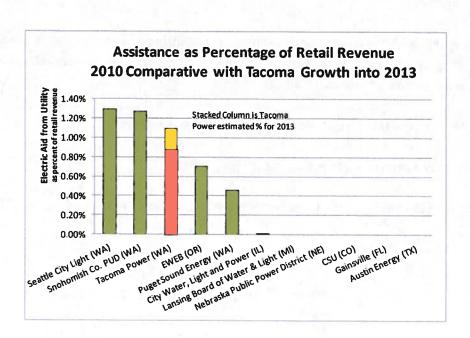

- Two Grant programs (Family Need and Power Aid) In 2013, Grant awards increased 17% from \$150 to \$175; funding pool also increased approximately 7% to \$1.92 million.
- Residential Rate Discount 30% ongoing rate discount to low income elderly/disabled. Increased discount in 2011 from previous 25%; approximately 7,400 accounts received assistance in 2011-12
- Conservation programs Free energy efficiency offerings such as weatherization, lighting, ductless heat pumps, electric heat duct sealing, etc.; Afterwards, ongoing conservation benefits the customer forevermore
- Budget Billing Flat monthly billings eliminate challenging winter time cost peaks and facilitate budgeting by offering predictability and providing for lower, more manageable, monthly billing amounts versus the standard bi-monthly billings
- LIHEAP Federal Low Income Home Energy Assistance Program
- Community Agencies Various assistance programs
- Billing Due Date Extension Extended billing due date from 10 to 15 days in July 2013

Low Income Comparisons to Other Utilities (Tacoma Power)

When measuring low income assistance (excluding conservation) as a percent of retail electric sales:

- > Tacoma Power expects to increase its low income assistance to 1.09% of retail electric sales revenue in 2013, an increase over the 0.88% expended in 2010 which is depicted in the chart below, the latest year for which data was obtained for peers.
- Northwest: The size of Tacoma Power's program is comparable to other Northwest peer utilities.
- Nationwide: The program is <u>large</u> compared to other national peer utilities; numerous national utilities do not offer any bill assistance.
- Tacoma Power's assistance when compared to revenues is about double that of Puget Sound Energy.

CITY OF TACOMA

QUARTERLY FINANCIAL REPORT

Through June 30, 2013

City of Tacoma, Washington

Office of Management and Budget / Finance Department Through June 30, 2013
General Fund Overview

	2013/2014 Biennial Budget	2013 Planned Amount	Year to Date Planned Amount	Year to Date Actual Amount	Variance Favorable/ (Unfavorable)	% Variance Favorable/ Unfavorable
Revenues	\$396,658,357	\$195,316,647	\$101,342,088	\$104,969,209	\$3,627,122	3.6%
Expenditures	\$393,245,860	\$189,817,521	\$90,265,442	\$85,978,019	\$4,287,423	4.7%
Revenue Over Expenditure Variance (Fund Balance)	\$3,412,497	\$5,499,126	\$11,076,645	\$18,991,190	\$7,914,545	

Summary

Through the first six months of 2013, or second quarter, revenues and expenditures are favorable. Revenues are positive; however, changes to this positive outlook can occur quickly, thus impacting future months. In addition, the favorable variances seen in expenditures through June are a result of Police Department jail cost saving, lower than anticipated medical claims for retired Police and Firefighters, as well as delayed expense payments to be realized later in 2013.

Revenue Overview

Through June, General Fund revenues were favorable by approximately \$3.6 M. Nearly all of the City's major revenue sources have realized favorable variances compared to original estimates. Increased Business Taxes (B&O) of over \$1.8M were a result of a 13% increase in retailing and wholesaling activity year over year. Favorable Business & License Permit revenues of nearly \$300K were a result of additional businesses and included in the positive variance are license fees of over \$200K that are more than a year past due. Sales taxes were also up by over \$800K due to increased revenue year over year in motor vehicle and parts dealer, personal and laundry services, and building construction.

Expenditure Overview

Through June, General Fund expenditures were favorable by approximately \$4.3 M. The two largest departments with favorable variances include the Police Department and Non Departmental. The Police Department realized a favorable variance of over \$1.0 M due to vacancy savings, jail cost savings, as well as delayed payments for fixed and operating costs. Non Departmental was favorable by over \$1.0 M due to lower than anticipated medical claims from retired Police and Firefighters and deferred computer purchases. Other favorable variances are due, in large part, to anticipated expenses that have been delayed or deferred to later in 2013.

City of Tacoma, Washington

Fines and Forfeitures	1,718,000	859,000	439,614	486,902	47,288	10.8%
Interest Revenue	1,537,000	764,056	391,276	336,343	(54,933)	-14.0%
Transfers	314,500	157,250	78,625	78,625	0	0.0%
Total	\$396,658,357	\$195,316,647	\$101,342,088	\$104,969,209	\$3,627,122	3.6%

Variance analysis for revenues is provided for all line items in which the actual amount differs from the planned amount by at least 10.0% and at least a minimum of \$100,000.

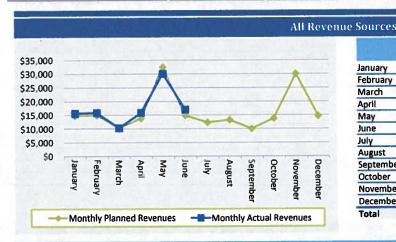

- 1 Property Taxes The variance as of the end of June is due to more timely payments of property taxes.
- 2 Sales Taxes The favorable variance is largely due to increased activity in retail sales, wholesaling and construction. Motor vehicle and parts sales were up 4.1% over the same period last year, up \$101K year over year. Wholesale durable goods sales were up 21.3% or \$187K. Construction was up 16.4%, or \$334K year over year; personal and laundry services were up by \$106K year over year, up 78.4%; and clothing and accessory sales were up \$46K year over year.
- 3 Retailing (B&O Taxes) Retailing revenues through June were up year over year by 13% largely due to construction activity and motor vehicle sales with a positive variance of \$825K.
- Service & Other (B&O Taxes) Through June, service revenues are up over \$1.65 million or 28% and continue to be higher than anticipated largely due to port activities (which are up 43%) and new construction related activities (which are up 83%). In June, one-time revenue of \$227K was received for back taxes from two businesses discovered through audit/compliance efforts.
- Cellular/Telephone (B&O Taxes) The refund of cellular tax in the amount of \$285K in May contributes to revenues being lower than anticipated however, revenues overall are still less than expected for Telephone and Cellular tax with a combined negative variance of \$700K. Revenues in this classification are fairly consistent month to month and are not expected to pick up in the last half of 2013.
- Other (B&O Taxes) Retail Service, Grain and the Multiple Activity Tax Credit indicate more than anticipated revenue. Most of the tax returns due April 30th have been reviewed with corrections reflected in May and June, Revenues leveled out but are still up slightly more than anticipated with a combined \$360K positive variance.
- 4 Utility/Gross Earnings Taxes With the exception of Power, gross earnings taxes are slightly above projections. Power revenues are unfavorable (-\$99K) due to a very small fluctuation in outside power sales. Tacoma Rail revenues are up by \$178K as volumes at the Port are near record high levels through June, due mostly to business associated with the Grand Alliance that moved to the Port from Seattle in July, 2012.
- S Other Taxes This category consists of Leasehold Excise and Gambling Taxes. February's distribution of leasehold taxes was reduced due to a refund of taxes that the Port of Tacoma had incorrectly assessed against Union Pacific Railroad for the period Jan 2009 Dec 2011. The refund amount taken in February from the City's Excise Tax was \$178K.
- 6 Business License & Permits More than anticipated revenues of \$298K in Business Licenses. Included in the variance are license fees of over \$200K that are more than 1 year past due. Delinquent accounts continue to be reviewed by Tax & License staff and as accounts are closed, where appropriate, the revenues are anticipated to level out.

City of Tacoma, Washington

Variance analysis for expenditures is provided for all line items in which the actual amount differs from the planned amount by at least 10.0% and at least a minimum of \$100,000.

- 1 City Attorney's Office The favorable variance is due to vacancies (+\$136K), fixed costs (+\$40K), and contracted legal service dollars (+\$140K) that have not yet been expended. However, these savings are offset by reduced charges to other city departments (-\$150K) for a net favorable variance of (+\$166K).
- 2 Fire Through June, the Fire General Fund reported 10 vacant positions including 8 commissioned and 1 civilian position (+\$272K). In addition, there is (+\$129K) in OT savings that has been realized; which will be expended in the next quarter. Lower fuel costs account for (+\$56K) in savings as well as deferred spending in professional services and external contracts (+\$53K). Other maintenance and operations savings amount to (+\$101K).
- 3 Human Resources The favorable variance is due to vacancies (+\$156K), delayed use of professional service contracts and travel & training dollars (+\$200K). However, these savings are offset by reduced charges to other city departments (-\$287K) for a net favorable variance of (+\$66K).
- 4 Library The favorable variance is due to 7 vacant positions (+\$136K), 3 are management positions. Most of these positions will be filled in July.
- 5 Municipal Court The favorable variance is due to lower than anticipated labor costs (+\$106K), lower rent expense and delayed purchases of bulk court forms (+\$58K).
- 6 Neighborhood & Community Services The favorable variance is due to 4 vacancies (+\$190K).
- 7 Planning & Development Services The favorable variance is due to a planner position vacancy and additional labor less outs to other funds (+\$122K), as well as contractual services and printing/graphic spending being deferred until later in the year (+\$37K).
- 8 Police The favorable variance is due to personnel savings from vacant positions (+\$170K); savings in Jail costs due to a new jail service contract with Fife implemented in December 2012 (+\$840K); SS911 contractual services (+93K). Also, city assessments account for (+\$143K) savings at this time.
- 9 Non Departmental Through June, the favorable variance (+\$1.0M) is primarily due to lower than anticipated medical claims from retired LEOFF I Police Officers and Firefighters.

^{*} PW Street includes Engineering and Street Operations only.

Please note that in instances where revenues for the biennium do not match expenditures, cash balance is being utilized

- 1 PW Streets Revenues: The favorable variance is due to Streets receiving a FEMA reimbursement in January 2013 for prior year expenses (\$185K). Expenditures: The favorable variance in street expenditures is due to savings in both the Engineering and Streets Divisions. The Engineering Division has a \$372K favorable variance is due to additional less outs of personnel for projects scheduled during the summer months. The Streets Division has a \$593K favorable variance due to three vacancies and increased labor less outs for seasonal work. In addition, maintenance and operation savings amount to \$188K due to a milder winter season requiring less equipment usage and maintenance; however power billings for streetlights, which have not posted for several months, may impact this positive variance.
- 2 TFD Emergency Medical Services Revenues: The positive variance was due to timing differences in property tax receipts, lower than anticipated discounts and a delay in writing off bad debt. Expenditures: Favorable variance is due to four vacant positions (\$319K) as well as deferred costs for software and SCBA equipment purchases.
- 3 Municipal Cable TV Expenditures: The favorable variance is due to labor and benefit savings from vacancies (+\$166K), and other maintenance and operations line items (+\$59K).

^{*}Operational Revenues and Expenditures only. Capital Outlay not included.

Please note that in instances where revenues for the biennium do not match expenditures, cash balance is being utilized

- 1 Permit Services Revenues: Year-over-year (2012 compared to 2013) through June, permitting has increased by 13% or 358 additional permits issued. Expenditures: Negative variance in labor is due to increased labor costs (-\$368K). Increased permitting activity has resulted in the need for additional staffing to maintain workloads. Telecommunication and other fixed costs are offsetting some of the negative variance due to equipment consolidation and conversion to a single device model (+\$50K) and city assessments account for (+\$73K) in savings.
- 2 PW Parking Operations Revenues: The favorable variance is due to higher than expected monthly lease revenue for the following properties: Park Plaza North (+\$68K) and Pacific Plaza (+\$43K). The Convention Center is experiencing higher than expected daily parking, generating more revenue (+\$176K). The Municipal Lot/Garage generated an additional (+\$23K) in revenues due to adding additional stalls open to the public. Also, the parking system has received a one-time revenue payment as guarantee for holding parking spaces for future use; this accounts for (+\$132K) in unanticipated revenues.
- 3 PAF Convention Center Revenues: The Convention Center has had 138 events through second quarter 2013; the historical average is 99 events resulting in higher than anticipated revenues. The Convention Rent and Food & Beverage categories both are over performing year-to-date (+\$122K). Expenditures: The favorable variance is due to a delay in contract payments and repair and maintenance related items (+\$280K).
- 4 PAF Tacoma Dome Revenues: While most revenue categories have over performed year-to-date, these gains are being offset by a negative variance caused by 2 concert events projected in June which did not materialize. Tacoma Dome staff is committed to securing similar events in the coming months to make up for this loss. Expenditures: Labor savings amount to (+\$219K) due to event setup efficiencies and minimal reliance on temporary external labor. Operating supplies are being deferred due to the current event schedule, causing a (+\$120K) favorable variance.

City of Tacoma, Washington

Office of Management and Budget / Finance Department

Through June 30, 2013

Other Funds Overview (Revenues and Expenditures)

Variance Analysis (continued)

- 5 Solid Waste Revenues: Favorable variance due to receiving grant funds for 2012 storm expenses (+\$156K). This is offset by a negative variance of over (-\$1.0M) due to the seasonal nature of commercial revenue; there are wide market fluctuations in the wholesale market. In addition, interest earnings are less than expected (-\$62K). Expenditures: While overtime expense is up, vacancies exist accounting for some savings in labor. Operating costs are under budget by (+\$624K) due to the elimination of bad debt expense and the seasonality of external contract services. Also, city assessments are currently under budget by (+\$600K).
- 6 Wastewater Revenues: Projection was based upon an even distribution of the approved rate increase, however the actual rate increase didn't begin until April 2013. Revenues are expected to level out over the course of the year. Expenditures: Labor savings amount to (+\$300K) in part due to reduced overtime; mild weather has reduced the need to utilize budgeted overtime expense. Also, city assessments are are currently under budget by (+\$400K).
- 7 Surface Water Revenues: Favorable variance is due to receiving more grant funding than planned. Expenditures: Labor savings is to temporary vacancies, additional labor less outs to capital projects, and reduced overtime expense (+\$339K). Telecommunication expenses are lower due to the implementation of right-sizing practices (+\$131K). Delayed spending on maintenance and operations items (+\$468K). Also, city assessments are currently under budget by (+\$317K).

Internal Service fund revenues and expenditures are closely related as most are funded through automatic charge backs (i.e. assessments) to city departments receiving the related service.

Please note that in instances where revenues for the blennium do not match expenditures, cash balance is being utilized

- 1 Budget & Research Expenditures: Favorable variance due to one vacancy and associated support costs.
- 2 Information Systems Expenditures: Favorable variance largely due to Local 120 contract negotiations still being underway and four vacancies resulting in a savings of (+\$478K). Computer and operating supplies are purchased on an as-needed basis contributing to (+148K) in savings. Training & Travel savings are (+\$164K). Delayed and lower than anticipated capital expenditures account for (+\$400K) in savings.
- 3 Municipal Building Acquisition & Operations Revenues: The unfavorable variance is due to the timing of manual billings to internal customers. Expenditures: The favorable variance is due to lower than anticipated maintenance and operations expense including repair and maintenance related items.

- 1 Workers Compensation Contributions to this fund have remained consistent at approximately \$740K per month, however in the first 6 months of 2013, monthly expenses have remained consistently lower at an average of \$565,000 per month. Of this amount, the 6 month claims average has been \$352K.
- 2 Health Care Labor Management Contributions to this fund have remained consistent at approximately \$4.6M per month. Claims in the first 6 months of 2013 have ranged from \$2.8M to \$5.0M per month. Due to the unpredictable nature of medical claims, this fund will continue to be monitored to insure the City maintains adequate funding for health care claims. Even with the year-to-date negative variance, this fund currently has a healthy cash reserve balance.

2013 Budgeted Major General Fund Revenue Sources for Comparable Cities

Disclaimer: While all of these cities use similar titles for revenue sources, the types of revenues contained within the General Fund (GF) differ, as do their groupings. These differences make the direct comparison of varying city's revenues by category and percentage problematical. For example, until this year, Fife entered all of their debt service revenues from the property tax directly into a debt service fund, whereas Tacoma receipts them into the GF and subsequently transfers them out to the debt service funds. This type of activity may go unnoticed when viewed by someone unfamiliar with this city's practice. As an example of how the categories may differ, Seattle's GF contains parking revenue, while Tacoma receipts these monies into their own fund. These are only a few of the challenges faced when comparing one city's revenues structure with another.

2013 Budgeted Major General Fund Revenue Sources for Comparable Cities
