Subject: DRINKING WATER ISSUE IN LACEY ARE WE NEXT?

Dear Tacoma City Council, City Manager, Planning Commission, Planning Dept, City Clerk,

I received this notice today and thought I would share it with you. You need to see what other cities are being driven to do – LOOKING FOR WATER.

What are you going to do when we can't get any water from Green River because we are losing glaciers and there is no snow pack in most of the Cascades. Yet our precious RECHARGEABLE AQUIFER in South Tacoma is going to be gone because of the warehouse.

READ THIS – IT IS IMPORTANT !!

Esther Day

Subject:] Lacey is literally gonna drill in vacant lots of established neighborhoods in hopes of finding more water for more sprawl...

Date:Sat, 12 Aug 2023 00:35:13 -0700

The City of Lacey will spend \$408,000 to dig three deep holes in hopes of finding more city water. The Lacey City Council awarded the contract Thursday to Kent-based Malcolm Drilling Co., which will dig a 600-foot borehole near an existing city well on Judd Street, plus two more holes at 300 feet and 600 feet on undeveloped property in the same area. The work is expected to begin in September and last 80 days, according to information shared with the council. "Additional water supply is needed to provide continued adequate domestic and fire flow water supply to the city's customers," city officials said in Thursday's meeting agenda materials. "Satisfying the water rights development schedule is critical for maintaining adequate supply capacity for the community." The 600-foot borehole at the existing well site will be abandoned after soil strata and water quality are obtained, according to the city. The two other holes, which are being drilled on property owned by resident Herberta L. Gray, will be converted to monitoring wells so that the quality of the water can be analyzed:

Subject: Downtown Parking Restrictions Dangerous for local residents

Good Afternoon, Councilmembers.

At about 1 a.m. Saturday morning, 8/12/23, my friend Mary Smith was shot, along with two others, in front of her apartment building between 8th and 9th on Pacific. She is doing surprisingly well, in spite of a bullet remaining in her hip. Mary is very lucky to be with us, but the fact is, she shouldn't have had to be outside her apartment at 1 a.m. at all. The City's aggressive parking enforcement in the area requires that residents of buildings without parking move their cars and pay for parking throughout the day to avoid being ticketed or towed. I am requesting that the City do something to ensure that downtown residents who must park on the street are not forced to go out at all hours to move their cars. It would be great if there were no meters at all - and no shootings - but the City can certainly do something immediately to fix this for downtown residents. Please provide at least parking vouchers to residents in this area who are not provided parking spaces. The folks that live in my friend's building are low income and should not be forced to continually worry about parking enforcement and risk injury or worse to park their vehicles near where they live.

Thanks for your attention to this matter.

Jenn Barfield
Tacoma resident, District 5

Subject: Hilltop Street Fair road closure of South 11th Street between M Street and MLK Jr Way
Attachments: August General Member Meeting

To Hilltop Business Association and City of Tacoma:

Greetings. Some of you know me and most of you don't. My name is Matt Tucker. I own a social service/computer/income tax business located at 1212 S. 11th St. Ste. 26, Tacoma, WA 98405 (on the private paved alley, between the first two buildings directly east and across M Street from Safeway, also known per Google Maps and will be referred to in the remaining of this email as Court M), in the quad of office units next to the dentist and across from Kyva Massage, and have been since 2005. I am writing, as was unable to attend the last Hilltop Business Association meeting, regarding this year's upcoming Hilltop Street Fair (specifically about possible road closure of South 11th Street between M Street and MLK Jr. Way) and am notifying you (Hilltop Business Association and City of Tacoma) stating a request/demand on behalf of myself and my business and the behalf of the property owner of the quad of office units (suites 24, 25, 26, & 27) that my business is located in and possibly future legal action against the Hilltop Business Association and City of Tacoma.

As you are aware, a few of years ago (before the Covid shutdown) the City of Tacoma built a cement divider median on South 11th Street from M Street halfway to M.L.K. Jr. Way (the private paved alley/road, between the third and fourth buildings directly across the street from Safeway, also known per Google Maps as and will be referred to in the remaining of this email as Court L). Due to the City of Tacoma building that cement divider median on South 11th Street, it has made exiting Court M onto South 11th a one way right turn only onto South 11th Street. Some of you, that have been in the Hilltop area, for at least 7 years, may or may not know that there used to be two One Way signs installed by the City of Tacoma in the sidewalk on South 11th Street directly on either side of Court M and had been there for many years and replaced by the City of Tacoma (when vehicles had damaged/destroyed them when running over them) up until a couple of years prior to 2018. Due to the One Way signs having been there for many years, property owners and businesses on Court M and other people driving to the properties or businesses on Court M were told and became accustomed to considering Court M as a one way alley/road going the driving direction from Earnest S. Brazill Street to South 11th Street. Per the City of Tacoma, Court M and Court L are legally considered a private alleys (private property) but legally open to public access only due to having businesses in the building suite units on Court M and Court L. With the City of Tacoma having installed and replaced (when damaged) the One Way signs in the sidewalk on directly on either side of Court M on South 11th Street at the cost of City of Tacoma's, this set a legal precedent that Court M is/was considered by the City of Tacoma as a one way street going the driving direction from Earnest S. Brazill to South 11th Street. There has been no notice (as required by law) by the City of Tacoma of any City of Tacoma public hearings regarding discussing and/or changing how the City of Tacoma considers or the legal precedent set by the City of Tacoma of Court M being a one way directional driving public access alley from Earnest S. Brazill Street to South 11th Street.

The last year that the Hilltop Street Fair occurred, it closed down South 11th Street from M Street to at least M.L.K. Jr. Way. That was done without any notice to any property owner, business owner, or property owner on Court M or Court L or South 11th Street that may not attend the meetings of or be a member of the Hilltop Business Association or in the surrounding area of those alleys/streets. The City of Tacoma and Hilltop Business Association doing that, without any prior notice to the property owners and businesses/organizations on those alleys/streets (Court M and Court L) prior to closing South 11th Street from M Street to M.L.K. Jr. Way for the Hilltop Street Fair, may have and did cause hassle and irritation for the property owners and businesses/organization and the business'/organizations' customers/clients and may have or did cause loss of revenue for those businesses/organizations (as it did to mine) due the change and difficulty or inability to arrive or leave the surrounding properties affected by the closure of South 11th Street from M Street to M.L.K. Jr. Way. Therefore, if the Hilltop Business Association and City of Tacoma are considering or planning on closing South 11th Street from M Street to M.L.K. Jr. Way for the Hilltop Street Fair to occur, that for the benefit of the property owners and businesses or residents on Court M and Court L and for the benefit or the Hilltop Business Association and the City of Tacoma (due to reducing the risk of legal action being taken for inaccessibility and loss revenue against the Hilltop Business Association and City of Tacoma by the property owners or businesses or residents on Court M and/or Court L and/or South 11th Street between M Street and M.L.K Jr. Way), I suggest and demand that the Hilltop Business Association and City of Tacoma only close down South 11th Street beginning east of Court L (leaving the ability for vehicles driving east on South 11th Street to do U-turn at the end of the cement divider median on South 11th Street that extends from M Street to Court L) so that the property owners and residents and businesses and

customers/clients or visiting the properties/residents/businesses on Court M and Court L can access (arrive and leave) those properties/residents/businesses by vehicle via South 11th Street and that the Hilltop Business Associations and City of Tacoma provide notification to any property owners/residents/businesses of Court M and Court L and South 11th Street between M Street and M.L.K. Jr. Way (either via postal paper or other paper notification left directly at property) at least two days prior to closing South 11th Street from M Street to M.L.K. Jr. Way for the Hilltop Street Fair to occur. If either of these suggestions/demands are not done, then I (on behalf of my business) and maybe other property owners or businesses or property residents that are negatively affected may or will take legal action against the Hilltop Business Association and the City of Tacoma for damages resulting from such things as, but not all inclusive of, inability to access property/business/residence and loss income/revenue and any violations of city/county/state laws regarding those said damages or others like failure to notify within required amount of time/days.

Subject: August General Member Meeting

Date: Mon, 14 Aug 2023 12:08:13 -0700

As the Street Fair draws nearer, the HBA would like to share some final details for this year's Hilltop Street Fair. Join us this Wednesday for this month's General Member Meeting at Hilltop a GoGo from 6-7pm.

HILLTOP BUSINESS ASSOCIATION

Monthly Member Meeting

Talk Openly, Connect with other Hilltop Businesses, Share Opinions & Ask Burning Questions

**WEDNESDAY
AUGUST 16TH**

at Hilltop a Go Go
1016 M.L.K. Jr Way
6pm - 7pm

On the Agenda:

This month's meeting will feature final updates for this year's Hilltop Street Fair. Come hear about all the activities we have going on this year, including the Car Show and all of the great performers.

ALSO HEAR FROM:
CITY OF TACOMA
TACOMA PUBLIC UTILITIES
SOUND TRANSIT
TACOMA PD

FOOD AND REFRESHMENTS PROVIDED

**More information:
INFO@HILLTOPBA.ORG**

HILLTOP STREET FAIR 2023
EMBRACING FUTURE
SATURDAY AUGUST 26TH 11AM - 7PM
100+ Vendors
20 Food Vendors
Car Show
Live Performances from:
Will Jordan - Kat Archer and Ben - Adrian Millett
Sweet Rascals - Christian Polge - WAX
Mardi Gras Band - Orchestra Grove - and more music!
HILLTOPBA.ORG/EVENTS

HILLTOP BUSINESS ASSOCIATION PRESENTS

HILLTOP STREET FAIR

2023

EMBRACING THE FUTURE

SATURDAY
AUGUST 26TH

11AM - 7PM
**11TH & MLK
AND PEOPLE'S PARK**

- 100+ Vendors
- 20 Food Vendors
- Car Show
- Bouncy Houses and Kid's Play Area

Live Performances from:

Will Jordan • Kim Archer and Brian • Adrian Milanio
Sean Brooks • Christian Paige • WAX
Marshall Law Band • Orthodox Crew ...and Many More!!!!

HILLTOPBA.ORG/EVENTS

IF YOU'D LIKE TO BE A VENDOR, VOLUNTEER OR SPONSOR, PLEASE VISIT HILLTOPBA.ORG

Follow Up Flag: Flag for follow up
Flag Status: Flagged

Dear Mr. Huffman,

In the SEPA application the applicant ignored the importance of the aquifer to the well field production. There are wellhead inter-ties not discussed.

In particular 11A, 6B, 4A, 9A, and 12A. These wellheads are interrelated and operating together is part of the Remedial Actions taken. Their importance is discussed in multiple documents of the **Commencement Bay, South Channel Superfund Site**, but somehow not responsibly included in SEPA.

How they are operated is discussed in the 2018 TPU Integrated Resource Plan (revised 2019) See page 4-9.

The applicant's plan is to cover approximately 120 Acres of the aquifer and then put that rainfall into essentially less than 6 acres of "infiltration galleries" thus likely changing the aquifer at the north well, the south contaminated properties, and on site as well.

In their written submission the required infiltration storage volume is 1,515,600 cubic feet. On the civil drawings they show an infiltration volume of 1,097,350 cubic feet.

Which is it? Why is it so different? Quite a discrepancy.

They show oil / water separators located **after** the unnamed water quality vaults of unknown manufacturer and unknown capability. This is not allowed by the design requirements in **Ecology's Manual Volume 5, Chapter 13, Section I**: Introduction to OWS. OWS are to be located in front of water quality BMPs.

Also is **the issue of traffic**.

The words appear intentionally deceptive as to traffic using S. 56th. The documents ignore the many trucks using the area already. This must be corrected.

The response is to ignore that there is a trucking company called "Greenstate Transportation LLC currently using that route. Sutter Metals, Pioneer Building Supplies, Service Master to name a few others. Then pretend that they can do something about it with multiple silly, unenforceable statements.

Totally irresponsible.

That they left these out should be sufficient to withdraw the MDNS.

TENW MAP - missing a lot of traffic information.

5.2 Groundwater Wells

In addition to the surface water supply, the Tacoma Water system includes 24 wells (in addition to the North Fork wells) and one spring that are used to supplement the Green River supply. Five additional wells are not actively maintained. These wells are either not properly equipped to be operational, are not connected to the system, or are for emergency use only. Table 5-1 provides a summary of the wells in the system and Figure 4-2 shows their locations. Tacoma Water's goal is to increase in-town groundwater production to 55 MGD. The following sections provide a brief description of the wells.

Table 5-1. Summary of Actively Maintained Wells

Well	Wellfield / Location	Nominal Capacity (MGD)	Not Equipped*	No Corrosion Control	Notes
1B	South Tacoma	3.5			
2B	South Tacoma	2.0	•		Use restricted due to potential contamination concerns.
2C	South Tacoma	2.9			Use restricted due to high ammonia levels. Requires breakpoint chlorination for ammonia treatment.
3A	South Tacoma	1.1			
4A	South Tacoma	1.3			
5A	South Tacoma	6.5			
6B	South Tacoma	3.9			
7B	South Tacoma	1.2			
8B	South Tacoma	4.4			
9A	South Tacoma	4.5			
10C	South Tacoma	0.6			Includes fill station available to the public for un-fluoridated water supply.
11A	South Tacoma	8.8			
12A	South Tacoma	5.0			
13A	South Tacoma	1.1			

Updated February 2019 | 5-3

The MDNS should be withdrawn due to missing topics not included, incompleteness, inaccuracies, and conflicts in their submission.

Sincerely,

Kit Burns

SOUTH TACOMA AQUIFER PRODUCTION WELLS

South Tacoma Groundwater Protection District

August 17, 2023

To City Council Members:

Based upon multiple city-funded studies and management plans, there is consensus that the Schuster Slope would benefit from removal of the unhealthy big leaf maple trees that dominate the slope and replace them with low growing trees, shrubs, and groundcover to anchor the slope, provide space for recreation, limit encampments, and enhance views.

Despite the fact that recommendations for tree removal have been in place for at least 21 years, the progress towards this goal has been minimal.

I support the proposed Schuster Slope Renewal Plan submitted by the SOS Group, calling in the next year, for 40-60% of the existing trees on the upper slope to be cut back and new undergrowth planted, with follow up in ensuing years per the proposed plan. This will:

1. Stabilize the slope
2. Provide a safe place for recreational usage, trails, etc.
3. Discourage illegal encampments,
4. Maintain a habitat for wild life
5. Improve property values
6. Provide for marine views, including the Tacoma Waterway and Commencement Bay for residents, pedestrians and riders of the Tacoma Link and other vehicles.

We request from the city council, funding for this project from City funds supplemented as needed by State and/or Federal funds.

Individual comments: *This replacement of towering Maples with lower growth vegetation has been promised to citizens since I was on the Council (2002-09)!*

Sincerely,

Name

Date 8/2/23

To City Council Members:

Based upon multiple city-funded studies and management plans, there is consensus that the Schuster Slope would benefit from removal of the unhealthy big leaf maple trees that dominate the slope and replace them with low growing trees, shrubs, and groundcover to anchor the slope, provide space for recreation, limit encampments, and enhance views.

Despite the fact that recommendations for tree removal have been in place for at least 21 years, the progress towards this goal has been minimal.

I support the proposed Schuster Slope Renewal Plan submitted by the SOS Group, calling in the next year, for 40-60% of the existing trees on the upper slope to be cut back and new undergrowth planted, with follow up in ensuing years per the proposed plan. This will:

1. Stabilize the slope
2. Provide a safe place for recreational usage, trails, etc.
3. Discourage illegal encampments,
4. Maintain a habitat for wild life
5. Improve property values
6. Provide for marine views, including the Tacoma Waterway and Commencement Bay for residents, pedestrians and riders of the Tacoma Link and other vehicles.

We request from the city council, funding for this project from City funds supplemented as needed by State and/or Federal funds.

To City Council Members:

Based upon multiple city-funded studies and management plans, there is consensus that the Schuster Slope would benefit from removal of the unhealthy big leaf maple trees that dominate the slope and replace them with low growing trees, shrubs, and groundcover to anchor the slope, provide space for recreation, limit encampments, and enhance views.

Despite the fact that recommendations for tree removal have been in place for at least 21 years, the progress towards this goal has been minimal.

I support the proposed Schuster Slope Renewal Plan submitted by the SOS Group, calling in the next year, for 40-60% of the existing trees on the upper slope to be cut back and new undergrowth planted, with follow up in ensuing years per the proposed plan. This will:

1. Stabilize the slope
2. Provide a safe place for recreational usage, trails, etc.
3. Discourage illegal encampments,
4. Maintain a habitat for wild life
5. Improve property values
6. Provide for marine views, including the Tacoma Waterway and Commencement Bay for residents, pedestrians and riders of the Tacoma Link and other vehicles.

We request from the city council, funding for this project from City funds supplemented as needed by State and/or Federal funds.

To City Council Members:

Based upon multiple city-funded studies and management plans, there is consensus that the Schuster Slope would benefit from removal of the unhealthy big leaf maple trees that dominate the slope and replace them with low growing trees, shrubs, and groundcover to anchor the slope, provide space for recreation, limit encampments, and enhance views.

Despite the fact that recommendations for tree removal have been in place for at least 21 years, the progress towards this goal has been minimal.

I support the proposed Schuster Slope Renewal Plan submitted by the SOS Group, calling in the next year, for 40-60% of the existing trees on the upper slope to be cut back and new undergrowth planted, with follow up in ensuing years per the proposed plan. This will:

1. Stabilize the slope
2. Provide a safe place for recreational usage, trails, etc.
3. Discourage illegal encampments,
4. Maintain a habitat for wild life
5. Improve property values
6. Provide for marine views, including the Tacoma Waterway and Commencement Bay for residents, pedestrians and riders of the Tacoma Link and other vehicles.

We request from the city council, funding for this project from City funds supplemented as needed by State and/or Federal funds.

To City Council Members:

The Schuster Slope is a mess. Not only is it a haven for hobos and ne'er-do-wells, but the Slope has suffered from years of neglect and improper management. There are multiple city-funded studies and management plans suggesting the Schuster Slope would benefit from removing invasive and unhealthy big leaf maple trees and replacing them with low growing native plants to effectively anchor the slope, provide space for recreation, discourage encampments, and enhance views.

Indeed, recommendations for tree removal have been in place for at least 21 years, but there's been minimal progress to date.

I pay taxes and vote and I wholeheartedly support the proposed Schuster Slope Renewal Plan as submitted by the SOS Group which calls for 40-60% of the existing trees on the upper slope to be cut back and new undergrowth planted. Importantly, the "environmental work" is already in place as the Plan is entirely consistent with historical recommendations which have already been done and paid for.

Pursuing a more effective Shuster Slope plan will:

1. Stabilize the slope,
2. Provide a safe place for recreational usage, trails, etc.
3. Discourage illegal encampments,
4. Maintain a habitat for wildlife and,
5. Create a more visually pleasing entrance to both the Stadium Business District and Old Town on to Ruston Way.

I believe this plan requires modest funding which could come from City funds supplemented as needed by State and/or Federal funds. I encourage you to support this long overdue project.

Sincerely,

Individual comments:

I have lived in my condo on Stadium Way for 7 years. The Slope is eroding + the trees with heavy tops are sliding + falling. The more recent planted pine type trees have grown over 2 feet in the past year, blocking the view. We need ground cover + low/medium growth plants with deep roots on the hillside. Our condo recently had to drive pilings along our Stadium Way side 80-120 ft due to continued settling just across the street from the slope. We need the City to follow the guidance they Sincerely, have received several times over the past 25 years, which is summarized in the SOS proposed plan! Thank you!

SOS

Schuster Slope Renewal Plan

Date August 15, 2023

To City Council Members:

Based upon multiple city-funded studies and management plans, there is consensus that the Schuster Slope would benefit from removal of the unhealthy big leaf maple trees that dominate the slope and replace them with low growing trees, shrubs, and groundcover to anchor the slope, provide space for recreation, limit encampments, and enhance views.

Despite the fact that recommendations for tree removal have been in place for at least 21 years, the progress towards this goal has been minimal.

I support the proposed Schuster Slope Renewal Plan submitted by the SOS Group, calling in the next year, for 40-60% of the existing trees on the upper slope to be cut back and new undergrowth planted, with follow up in ensuing years per the proposed plan. This will:

1. Stabilize the slope
2. Provide a safe place for recreational usage, trails, etc.
3. Discourage illegal encampments,
4. Maintain a habitat for wild life
5. Improve property values
6. Provide for marine views, including the Tacoma Waterway and Commencement Bay for residents, pedestrians and riders of the Tacoma Link and other vehicles.

We request from the city council, funding for this project from City funds supplemented as needed by State and/or Federal funds.

To Tacoma City Council Members,

RE: Save Our Slope Policy Recommendations

I have spent time not only attending meetings of the SOS committee, but I've also interacted with a couple of the environmental employees working the slope, read some of the studies and spent time looking at the slope itself from both above and below.

Based on these combined interactions and observations, I have concluded to support the SOS plan and to urge your support as well. This discussion has gone on far too long, since the early 2000's. It is time to begin removing or cutting trees to:

- Enhance growth of more appropriate and sustainable plant life.
- Insure slope stability.
- Improve views of those who have lost or are losing views of our spectacular Puget Sound.
- Improve property value and the accompanying tax base.
- Permit the development of trails for all.

Again, it is time to move forward for the benefit of all Tacoma citizens.

Thank you for your consideration,

Joseph L Carman IV

August 1, 2023

To City Council Members:

Based upon multiple city-funded studies and management plans, there is consensus that the Schuster Slope would benefit from removal of the unhealthy big leaf maple trees that dominate the slope and replace them with low growing trees, shrubs, and groundcover to anchor the slope, provide space for recreation, limit encampments, and enhance views.

Despite the fact that recommendations for tree removal have been in place for at least 21 years, the progress towards this goal has been minimal.

I support the proposed Schuster Slope Renewal Plan submitted by the SOS Group, calling in the next year, for 40-60% of the existing trees on the upper slope to be cut back and new undergrowth planted, with follow up in ensuing years per the proposed plan. This will:

1. Stabilize the slope
2. Provide a safe place for recreational usage, trails, etc.
3. Discourage illegal encampments,
4. Maintain a habitat for wild life
5. Improve property values
6. Provide for marine views, including the Tacoma Waterway and Commencement Bay for residents, pedestrians and riders of the Tacoma Link and other vehicles.

We request from the city council, funding for this project from City funds supplemented as needed by State and/or Federal funds.

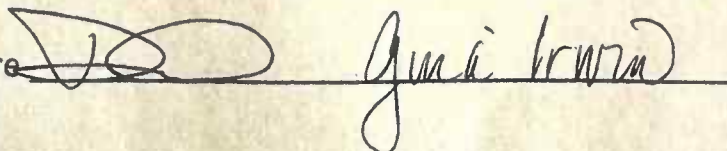

Individual comments:

Sincerely,

Name: Dean & Gina Irwin

Based upon multiple city-funded studies and management plans, there is consensus that the Schuster Slope would benefit from removal of the unhealthy big leaf maple trees that dominate the slope and replace them with low growing trees, shrubs, and groundcover to anchor the slope, provide space for recreation, limit encampments, and enhance views.

Despite the fact that recommendations for tree removal have been in place for at least 21 years, the progress towards this goal has been minimal.

I support the proposed Schuster Slope Renewal Plan submitted by the SOS Group, calling in the next year, for 40-60% of the existing trees on the upper slope to be cut back and new undergrowth planted, with follow up in ensuing years per the proposed plan. This will:

1. Stabilize the slope
2. Provide a safe place for recreational usage, trails, etc.
3. Discourage illegal encampments,
4. Maintain a habitat for wild life
5. Improve property values
6. Provide for marine views, including the Tacoma Waterway and Commencement Bay for residents, pedestrians and riders of the Tacoma Link and other vehicles.

We request from the city council, funding for this project from City funds supplemented as needed by State and/or Federal funds.

Individual comments:

Sincerely,

Name

STEVEN SUTOB

Address

525 Broadway #108 Tacoma, WA 98402

Signature

Steven,

To Stadium Community Members and interested Parties:

Action is needed to improve conditions on Schuster Slope to ensure slope stability, and create a safe, welcoming space for recreational use by walkers, families, visitors, and a haven for wildlife; AND reclaim some of the best views in Tacoma between Stadium High School and the I-705 ramp.

City funded studies and reports over the past two decades have identified problems with the slope and solutions, but the recommendations have not been implemented. Save our Schuster Slope (SOS) is proposing a plan of action to present to the City of Tacoma to implement recommendations based on the following:

1. Current vegetation on the slope is in poor health and life span is limited.
2. Establishing undergrowth and groundcover is necessary for slope stability.
3. More sunlight is necessary for undergrowth and groundcover to flourish.
4. Diseased trees must be thinned to allow sunlight penetration.
5. By replacing diseased trees with fast growing shrubs and low-profile trees, slope stabilization and view reclamation can both be attained.

We will submit our plan in more detail to City Council Representatives on August 17.

To reflect the level of community concern for this issue, we need as many letters of support as possible from community members and interested parties.

Please sign the support letter attached to this e-mail and send it back **by August 15**. There are options for returning your signed response:

- A petition has been set up at Change.org that you can sign by following this link <https://chng.it/5mFmJQXXnG>
- By dropping your signed letter at the Tacoma Union Club office located at 539 Broadway in the SOS designated mailbox inside between 9:00 a.m. to 4:00 p.m. or in the SOS designated box outside after 4:00; or
- Return e-mail to the sender's e-mail address.

Thank you,

SOS Working Group Members:

Curt Anderson, Kurt Olson, Mark Adams, Barb Hepfer, Michael Seiner, and Roxanne Auge.

Emily,

Jacoma Council Meeting August 22, 2023

Carole Sue Braaten
Rec'd 8/22/2023

There are only a hand full of ~~compet~~ ^{Carole Sue Braaten} LNG companies that do Liquefied Natural Gas Facilities Environmental Impact Statements nation wide. None of the ~~the~~ Liquefied Natural Gas Qualified companies to do Environmental Impact Statements were hired by the City of Jacoma Planning Dept., to do the Puget Sound Energy PSE Liquefied Natural Gas LNG Facility. ~~None of the~~ Companies that do LNG Environmental Impact Statements / EIS Must be contacted by the individuals ^{wanting to} ~~doing~~ any LNG Environmental Impact Statements those companies do not contact anyone to do the EIS they wait to be contacted.

City of Jacoma Planning unknowingly through a letter received a letter from a Unqualified company offering to work with Jacoma Planning to do the PSE LNG Facility Environmental Impact Statement. ^{Not working for city of Jacoma}

I am asking the Jacoma Council to do a New Environmental Impact Statements / EIS by one of the few Qualified companies to do a Liquefied Natural Gas Facilities. To do an immediate Environmental Impact Statement of The Port of Jacoma PSE LNG facilities which will show that City of Jacoma Planning Dept was lied to by these other companies

threat of
danger

~~City~~ Tacoma Council Meeting
Aug 22, 2023
Carol Sue Braaten

a Deceptive misrepresentation of facts, in order to have the PSE LNG Facility built. Have ~~the~~ ~~Company~~ Qualified ~~Environmental~~ ~~Engineers~~ Company to do both a review of the 2015 PSE LNG FEIS and a new PSE LNG Environment Impact Statement

The Tacoma Council needs to rescue the city ^{Tacoma} planning and save the people with in the Exclusion Zone / Thermal Radiation and Asphyxiation zone

Also the Tacoma Link is soon to open on ~~the~~ Stadium way above Schuster Parkway on ^{the} Landslide Hazard Area. This area was already sinking, and having slope destabilization 2006 - 2007. No Qualified engineer that has a Landslide hazard endorsement on there Licence has approve this area. I am asking Tacoma Council contact the state Geology Dept who has one of the few Landslide hazard experts in the state of Washington. The road way could catastrophically fail

Geological engineers
