

QUESTIONS TO BE CONSIDERED AT MEETING 10

In discussion with Co-Chairs, it was agreed that the CWG should seek to answer the following questions in order to more fully define the recommendations.

Item		Outcome
Overall Interests:		
1. General Guidance: <i>Do you agree or disagree with this statement?</i>	<p>Generally, zoning should be least restrictive in Industrial zones and become more restrictive as zones change, <i>in the following order:</i></p> <p>Industrial → Commercial → Downtown → Mixed Use → Shoreline → Residential</p>	
Overall Target/Goal for number, square footage of BB		
2. Number of BB faces: Should code set a cap number?		
a. Should it be higher, lower, or the same as what we have on the ground today?		
3. Square footage of BBs in City: should code set a cap number?		
a. Should it be higher, lower, or the same as what we have on the ground today?		
Question 1: Where Should BB be Allowed? (which zones)		
4. Wall signs guidance <i>Agree or disagree?</i>	<p>Wall signs are OK in “Billboard Allowed” Zones if consistent with other BB size & height limitations relevant to that zone and they do not cover windows and architectural features?</p> <p>Alternately, would you support more generous size and height limitations with respect to wall signs in “Billboard Allowed zones” than are required for freestanding BB?</p>	
5. No consensus/ recommendation zones:	C-1	
<i>Allow BB or not?</i>	T	
	NCX	
Question 2: What Should Billboards Look Like? (Design, Buffers, Dispersal)		
6. Lighting <i>Agree or disagree?</i>	<p>If hours of illumination are restricted, does that provide some flexibility to reduce buffers?</p> <p>If <u>no</u> lighting of a BB is allowed w/in a residential buffer, could the residential buffer be smaller?</p>	

Additional request from S. Winters: revote special use buffers.

How big should special use buffers be?

Vote from Meeting 8:

Options: 500 ft. 300 ft. 250 ft. 100 ft. 50 ft. 0 ft.

Buffer distance from a billboard in zone below to adjacent zone (to right).	Special Uses		
Industrial (M-1, M-2, PMI)	250 ft. or less		
Mixed Use (CCX, UCX, CIX)	100 ft. or less		
Commercial Zones (C-2, PDB)	100 ft. or less		
Downtown Zones (DCC, DMU, WR)	250 ft. or less		

Special Uses include those defined in current code: schools, churches, public open space, playgrounds, parks, historic and conservation districts, registered historic properties.
