- Modal networks
- Concurrency
- Adopted Appendices

This vision is supported by six key goals, which provide guidance for the priorities and recommendations embodied in this plan:

Being a Partner

Proactively **develop partnerships** to best serve all users of the regional transportation system.

Protecting Community & Environment

Protect natural, as well as neighborhood, assets to create and connect places where people can live, work, and play in a safe and healthy environment.

Providing Mobility for All

Prioritize the movement of people and goods via modes that have the least environmental impact and greatest contribution to livability in order to build a **balanced transportation network** that provides mobility options, accessibility, and economic vitality for all.

Striving for Fiscal/ Environmental/ Social Sustainability

Design an **environmentally and fiscally sustainable transportation system** that serves its users through strategic planning efforts, funding, and projects.

Leveraging Programs/Strategies

Develop and implement **transportation demand management strategies** and programs that contribute to the overall effectiveness of the multimodal transportation system.

Linking to Land Use

Build a transportation network that **reinforces Tacoma's land use vision and the Growth Management Act**.

Tacoma is a **sustainable** community with many diverse residents, businesses, and visitors who have various transportation priorities. The City is **strategic** in how it plans its transportation system with an emphasis on carrying the people and goods that foster Tacoma's culture, character, and competitiveness. The transportation system offers **multimodal** travel options that provide safe access for all users and neighborhoods, encourage healthy living, and protect the environment.
