- **Additional Height Allowed at 1' per 6% of Slope**
AMENDMENT PROCESS

2020 Amendment - Open House
### Tacoma View Sensitive District 20-Feet Overlay (VSD-20) - Draft Criteria

**NOTE:** These criteria are supporting the preliminary recommended areas and they are in draft form and subject to change.

<table>
<thead>
<tr>
<th>#</th>
<th>Criteria</th>
<th>Rationale</th>
<th>Data Source</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Block is within the existing VSD-25 overlay</td>
<td>View sensitive areas have already been identified by the City since 1989</td>
<td>City of Tacoma zoning map, all zones with VSD in name</td>
</tr>
<tr>
<td>2</td>
<td>Block is within the rough initial study areas identified by staff</td>
<td>Do not repeat recent analysis by staff</td>
<td>City of Tacoma LIDAR data</td>
</tr>
<tr>
<td>3</td>
<td>At least approximately 75 percent of the block already has houses under 20 feet tall</td>
<td>(a) Avoid creating excessive nonconforming situations, and (b) acknowledge that single-family homes often last 100 or more years and a new height regulation would have little to no effect on existing taller houses</td>
<td>City of Tacoma LIDAR data, which was verified for accuracy by City permit data and architectural drawings, Google Earth LIDAR data, and field measurements.</td>
</tr>
<tr>
<td>4</td>
<td>Most of the block is on land sloping more than 5 percent and less than 15 percent</td>
<td>This range is the most relevant given the distance from applicable views of waters, bluff, and the bridge; the size and spacing of blocks and streets; and existing mature trees. Flat lots generally have no views, and steeply sloping lots generally have good views regardless of adjacent house height and which is already protected by the VSD-25 limit.</td>
<td>Slope map developed by MAKERS, derived from City of Tacoma GIS contour data.</td>
</tr>
<tr>
<td>5</td>
<td>The block has a significant or fair view of distant waterways, bluffs, forested hillsides, mountains, or the bridge.</td>
<td>Additional building height restrictions are relevant only if a significant view is involved.</td>
<td>Field visits and Google Earth Streetview. While the quality of views is always subjective, the local reference point for a “significant” view is those from the southern part of Narrowmoor. Note the Pierce County Assessor uses different terms, and Assessor data has not been utilized in this review.</td>
</tr>
</tbody>
</table>
## Preliminary Study Area Statistics

<table>
<thead>
<tr>
<th>Name</th>
<th>Original Study Area Lots (estimate)</th>
<th>Recommended Lots as of 2/18/2020 (estimate)</th>
<th>Recommended Area (acres)</th>
