Assessment #1

Re: Objection to LIDS 8465

I object to the assessment. The property did not increase in value. Power lines were not placed below ground, and no underground improvements related to sidewalks impacted this property.

Additionally, the property appraiser used pre market crash real estate values in determining assessment.

We were not provided details related to this "Special Benefits Study" ~~we~~ object to this assessment.

During the meeting the appraiser indicated that value increased \$3 per square foot. How is this calculated? ~~Again~~ I objected.
