

PLAN
NTS

NOTES:

- Existing and proposed utility lines shall be located out of facility unless otherwise approved by Engineer.
- Abandoned utilities within footprint of facility shall be removed as needed. Coordinate with utility provider and Engineer.
- Curb bulbout width and street width varies with street type (e.g. arterial vs. residential). Maximum widths and lengths to be determined by City based on street.
- See Standard Plans GSI-03a, GSI-03b, GSI-03c for section.
- Overflow structure per Standard Plan GSI-13 or GSI-14, if shown on plans. Both curb cuts may be inlets if shown on plans and alternate overflow is provided.
