NOTES:
1. All driveways shall be approved by the Tacoma Landmark Preservation Commission.
2. Concrete shall be a minimum of Class 3000.
3. All joints shall be cleaned & edged. External joints to the driveway shall be 1/2" radius; internal joints to the driveway shall be 1/4" radius.
4. Driveways wider or narrower than shown on this plan require approval of the Director of Public Works.
5. 6" thick driveway section shall be a brushed finish in a transverse direction to the center line of the driveway.
6. Driveways wider than 20' require a center line expansion joint.
7. All expansion joints shall be full depth with 3/8" pre-molded joint filler.
8. When trenching through a driveway, replacements for driveways greater than 20' in width shall include a minimum 3' wide cut back over undisturbed soil and extend to the nearest control joint. Replacements for driveways 20' or less in width will require a full driveway replacement.
9. All joints shall be saw cut full depth prior to restoration and 3/8" expansion joint installed. Cutting wheel run-out beyond the limits of the opening shall be filled in accordance with WSDOT Standard Specification 5-05.3(3)B for cement concrete surfaces and 5-04.3(5)C for asphalt concrete surfaces.
10. Where distance from face of curb to front face of walk exceeds 12", a transverse joint shall be placed at the radius point or as directed by the engineer.
11. Driveways shall be placed before roadway restoration pavement.
12. Apply lamp black 1 lb. per cubic yard of cement concrete or as required for desired discoloration in accordance with ASTM D209-81 standard specification for lamp black pigment.
