

The iconic red ornamental lights in the Lincoln International Business District – a priority revitalization area for the Tacoma City Council – were replaced with new glimmer LED lighting to provide more and better lighting for the area. There are 23 arms with 46 fixtures (2 per arm) with a flat style base as well as 8 single fixtures with a 3” tenon base available for surplus. They are packed back in the boxes that the new light fixtures came in. There are 54 fixtures in boxes about 27”x27”x54” and 23 arms each in boxes about 18”x18”x41”.
