*The City finds that calculating the actual cost of copying, scanning, uploading and otherwise processing the records required to fulfill a public records request would be unduly burdensome including for the following reasons:					
1. The City employs over 3000 employees. Because the City's methodology for satisfying public records requests includes each employee conducting a search for and processing responsive records that may be in their possession, and all employees earn different rates of pay, the Public Records Officer would have to determine and calculate the salaries of all involved employees in order to invoice for actual costs.					
2. The City's Public Records Officer would be required to maintain a record of each employee who contributed to each part of a public records request and potentially charge different rates for different items in the same records production.					
3. The City's Public Records Office has limited staff and the response time to fulfill records requests may be delayed if it is required to calculate the actual costs of processing records and to create customized invoices or billing statements reflecting different rates and charges.
