Made by: Max Mousseau

General Notes:
1. During the Phase 1 investigation, composite samples were collected from the entire FD35 drainage area. The results from Phase 1 defined the boundaries of the Phase 2 to 4 investigation area. Phase 1 composite samples were collected on 11/2/2012 and the results are available upon request.
2. All symbols are colored based on the highest concentration of PCBs detected, regardless of the phase in which they were found.
3. Phase 2 samples were collected on 3/20/2013.
4. Phase 3 samples were collected on 5/25/2013.
5. Phase 4 sampling dates were between 5/31/2013 and 6/3/2013.
6. PCB Concentrations:  
   - < 1 ppm
   - 1 - 9.9 ppm
   - 10 - 49.9 ppm
   - > 50 ppm
   - Insufficient Sediment
   - No Samples Collected

ABBREVIATIONS:
- CB: Catch Basin
- SP: Side Pipe
- MH: Manhole
- ST: Storm Lines
- LID: Constructed Under LID6020 1975
- G1 to G37: Manhole
- C1 to C37: Catch Basin

Sampling Key

<table>
<thead>
