

greener car upholstery cleaner

Fabric upholstery: Use $\frac{1}{4}$ cup liquid soap (vegetable oil-based works best, but any kind will do) and whip it with 3 tablespoons water. Pull the foam off the top and rub it into the upholstery. Rinse well by blotting with a damp cloth.

Leather upholstery: Hold the rind of a lemon that has been sliced in half and rub it onto the stain. Or dab a cloth with lemon juice to clean the spot. A mild solution of dishwashing soap and water works, too.

Be sure to test this recipe on an inconspicuous part of your upholstery first.
