

greener clogged pipe cleaner

Ingredients:

- 1 cup baking soda
- hot tap water
- 4 cups inexpensive vinegar

Directions:

Prime the tap so hot water is ready to flow right away. Empty 1/2 cup of baking soda into the drain. Follow with 2 cups vinegar. Repeat the baking soda and vinegar. Once foaming stops, flush with hot tap water for about one minute, or until the drain clears. Repeat as necessary - usually about every three months.
