

greener mold remover

(for outdoor furniture and covers)

Ingredients:

- 2 teaspoons tea tree oil
(found at natural food stores)
- 2 cups water

Directions:

Combine ingredients in a spray bottle. Spot test the recipe on the underside of a cushion to make sure there's no discoloration. If there's no discoloration, spray the mixture wherever you see mold or mildew. Don't rinse. In a few days, the strong smell of the tea tree oil and the mold will begin to disappear.
