

greener wax remover

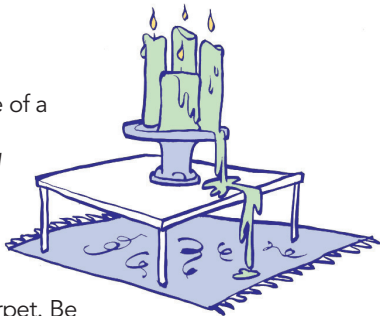

Directions:

"The Chill" method

- Chill the wax area with an ice cube.
- Once the wax is chilled, scrape with the edge of a butter knife.

"The Brown Bag" method *(not recommended for colored wax as it may stain)*

- Place a brown bag over the wax area.
- Run a warm iron over the bag.
- Gradually increase the heat on the iron until the bag begins to soak the wax out of the carpet. Be careful to not let your iron get too hot!
