

# *greener* red wine stain remover

## Ingredients:

- 1 lemon
- cornstarch
- eucalyptus essential oil
- glycerin (found in craft stores, natural food stores and some pharmacies)

## Directions:

Rinse the stain in cool water right away. Rub a slice of lemon over the stain several times. If the stain persists, make a mix of one heaping tablespoon of cornstarch, two drops of eucalyptus essential oil and one teaspoon of glycerin. Add just enough water to make a thick paste and spread it on the stain. Without rinsing, put the garment in the sun to dry. Rinse. Repeat the paste application if necessary.
