

EIS: Schedule

NW Innovation Works Tacoma—Tacoma Methanol Manufacture & Export Facility

Below is a schedule (anticipated) of the steps in the EIS process for NWIWT's TMMEF. **These dates are likely to change:** however, many timing requirements come from the Washington Administrative Code and Tacoma's Land Use Code in order to provide predictability for the public and for the applicant, and can only be adjusted within certain parameters.

Permit Decisions or Other Authorization to Undertake the Project

The City or any other agency may not act on the proposal—issuing development permits or other authorizations that would allow the proposal to proceed—for 7 days after the FEIS is published. When/if such authorization is given a Notice of Action will be mailed and published.

Appeals

The Notice of Action notifies interested parties that an action has been taken that will allow the project to proceed. The Notice will contain appeal provisions, and issuance of the notification starts the appeal period of 21 days.

**ALL DATES ARE
SUBJECT TO CHANGE**
